No Weakness Seen Nothing happened this week to call for a different diagnosis. The forward nesday were followed by a rather vio-lent shakedown on Thursday in the heaviest trading of the year, which the Street regarded as quite natural and which it welcomed. Yesterday the list was meas ordealy and the price for were not less prompt in seizing their apportunity.

apportunity. It is one thing to sell for profits with the idea of buying back at the lower levels and another to sell in order to get out of a dangerous market. It is not yet clear that the latter idea has taken any very firm hold of the specu-lative mind. Perhaps there is too much reliance on the profit tax theory. Howhative mind. Perhaps there is too much reliance on the profit tax theory. How-ever those who doubt it point to the fact that the market did not show weakness when the industrial cloud was as black as it is now and when call loans were renewing at 8, 9 and 10 per cent and when as high as 15 per cent was exacted for new accommoda-tion. This week call loans renewed at 6 per cent and later at 5 per cent. It might be observed a ith some truth Hud & Man R R fd It might be observed with some truth that the market instead of being divided into the two categories of industrials and rails has developed into a triple organization of standard shares, spe-cialities and rails. The number of so called specialities has been very largely increased in recent mouths by new likelines and recent the provement Hud & Man R R fd called specialtics has been very largely increased in recent months by new listings, and frequently their novement has been quite distinct from that of the others. In other words the market has often borne the specarance of surging ahead when the standard issues among both industrials and rails have held quite steady or neglected. Thus price movements have in a measure become susceptible to broader interpretation and at the same time call for more eareful analysis. Any positive trend among the specialties affects more or less the trend of the entire market, al-though violent upturns or setbacks may lead to false conclusions with respect to the state of the market as a whole. 1000...... 95 1000...... 95 Int Met et 414s
