"A Fine Log:"

Very Valuable When Delivered

"Jones thinks we ought to talk more in our advertising about quality," said the Junior Partner. "He says delivery isn't the whole thing."

"Well, it's not," said the Old Man; "but after all, the best lumber in the world isn't worth much until you get it on the spot.

"Once in North Carolina I met a darkey trying to haul a big pine log to the sawmill with an old cart and a lame mule.

"De mule ain't feelin' very good today,' he said to me, 'but maybe he'll get her started tomorrow. I tell you, dat's a fine log, sah. De boss gwine to give me eight dollahs cash money—says he'll pay it jes' as soon as I gets de log down to his place."

"No, delivery isn't everything—but nothing counts for much without it," said the Old Man.

Some day you'll build. If you want the work finished on time, see that the lumber comes from LLOYD.

Manufacturers Offered

A Deep Water Port Railway Centre

In Offering DIRECT

to manufacturers its peace surplus of factories, factory sites and equipment in the Petersburg-Hopewell Industrial District of Virginia, the Du Pont Chemical Company also is offering a manufacturing location of great strategic value for the shipment of products to domestic and foreign

This District, at the junction of the Appomattox and James Rivers-in reality a part of Chesapeake Bay-has steamer connection with trans-Atiantic, South American and coastwise ports. Products may be leaded on ships at the Hopewell wharf or transported in barges to vessels at Norfolk or Newport News. Vast quantities of war munitions were shipped from Hopewell, and it was used as an embarkation point for the shipment of thousands of troops from Camp Lee, in this District.

The District is served by the Norfolk and Western, the Atlantic Coast Line and the Seaboard Air Line, three great trunk-line roads which, with their connections, give Hopewell manufacturers rail access to all important market centres, North, East, South and West,

The District Has Many

other advantages of commanding importance besides transportation. These recommend it as a solution of the problems confronting the manufacturer who, because of adverse conditions affecting his business, desires a change of plant location; the manufacturer seeking a site for a branch factory, or the prospective manufacturer looking for a place to begin business.

Among these advantages are factories and railway sidings already built, factory sites affording ample room for expansion, an adequate labor supply and freedom from labor troubles, splendid housing facilities, low priced and abundant power, water and fuel; nearness to sources of many raw materials used in basic industries, low living costs to workers and a climate most favorable to industrial activity and health.

These factors enter vitally into the problems of increasing production, keeping down factory costs and raising the margin of profits.

A New Gateway to World Markets

Where Hopewell Is

The District is in the Chesapeake Bay area, lying 23 miles south of Richmond, the capital of Virginia, and about 80 miles west of Norfolk. The approximate first-class mail time between the District and ten large cities follows: Washington, D. C., 4 hours 20 minutes; Philadel-

phia, 7 hours 40 minutes; New York, 9 hours 40 minutes; Pittsburgh, 14 hours; Savannah, 13 hours 22 minutes; Atlanta, 16 hours 37 minutes; Boston, 16 hours 22 minutes; Cleveland, 17 hours 35 minutes; Chicago and St. Louis, 25 hours.

What Hopewell Is

Hopewell, during the war, contained the largest gun rotton plant in America and a population of 40,000. In addition to its manufacturing plants, it has churches, schools, clubs, hotels, theatres, stores, a commissary operating on a cost-plus basis, storage houses, Y. M. C. A., Y. W. C. A., electric lights, trolleys, sewerage, fire and police protection and, in fact, everything that constitutes a modern city.

Labor Unrest and Labor Shortage

are the two most serious conditions now affecting industry. Both tend to lower production and boost costs. Hopewell is free from these problems. Its supply of labor, skilled and unskilled, male and female, is sufficient for present and future needs. Living and working conditions are too

favorable to breed discontent and strikes The Du Pont Company obtained 30,000 workers at The Du Pont Company obtained 30,000 workers at Hopewell, and maintained an operative force of 20,000 while the war lasted. Most of these workers were recruited from the surrounding territory of Virginia, Maryland and the Carolinas. So-called "war wages" were not necessary because of low living costs. While workers received less in wages than at most war industrial centres, their actual savings were higher. Compared to prices in other cities, the Hopewell worker's fifty cents buys a dollar's worth of goods. dollar's worth of goods.

Hopewell's climatic and health conditions are among the best. It never is ice, snow or flood bound, being free from extremes of weather that interfere with business. The two rivers afford splendid opportunity for fishing and boating and game is plentiful in the woodlands. Garden and farm products are supplied from the surrounding districts at low cost, and groceries, etc., are sold at the commissary below regular market prices. In brief Hopewell is an ideal place to live and rear a family.

Natural Resources

To manufacturers in certain lines, Hopewell offers pre-ferred opportunity in its nearness to supplies of raw ma-terial. Within a radius of fifty miles are produced an-nually 555,000,000 feet of timber available for lumber or for pulp and paper making; 25,000,000 pounds of tobacco, 3,000,000 bushels of corn, 2,000,000 bushels of peanuts and other crops valued at over \$5,000,000. Cotton not only is grown in considerable quantity near Hopewell, but the railroads reaching up from the South afford excellent facilities for getting the product from the great cotton

There are also important deposits nearby of brick, tile and pottery clays; shell marks suitable for cement; mica, soapstone, moulding sand, mineral paint and Virginia

Three modern power plants with a total capacity of 60,000 horse power—enough to supply steam and electric power, light, heat and air pressure in any desired quantity. Electric power is sold to manufacturers as low as 1½ cents a kilowatt hour.

What Hopewell Has

Filtration plant with a daily capacity of 50,000,000 gallons—enough to supply a city of 500,000. Filtered water costs as low as 5 cents per 1000 gallons and un-

Houses, cottages, bungalows and dormitories sufficient to accommodate 12,000 additional workers. Rents average between \$11 and \$15 a month. Attractive homes for executives overlooking the James River at low rentals.

Available factories having floor areas of from 100,000 to 150,000 square feet; 1200 acres suited for factory sites with railroad sidings already built; 20 miles of broad gauge and 28 miles of narrow gauge.

Average summer temperature 75°; average winter temperature 41°; mean for entire year 58°; annual rainfall 46 inches; snow rarely remains on the ground more

Best fire protection in the world. This means low

Housing

The Housing Problem Is So Closely

allied with the problem of labor that a manufacturer these days must interest himself in what sort of homes are available for his workers. The scarcity of houses and consequent high rents lower the efficiency of labor as well as limit its supply.

Hopewell has no "housing problem." To accommodate its vast army of workers at Hopewell, the Du Pont Company built hundreds of cottages, bungalows and dormitories. These pretty homes, with lawns and gardens bordering on well-paved streets, are equipped with electricity and all modern conveniences.

For executives there are a large number of attractive houses on the bluffs, overlooking the James River. The rents for these are comparatively as low as the workers!

Our Experts

Technical, Industrial, Traffic

-will gladly study your specific requirements, and investigate your problems of raw materials, manufacturing processes and transportation. They will give you an unbiased report as to the adaptability of Hopewell (plant sites, present available equipment, raw materials, etc.) to your special needs. This service is free. It may lead to the solution of your problems. Get in touch with us promptly as we intend disposing of our surplus in the quickest possible time.

As its name implies, the du Pont Chemical Company is not a real estate concern. We have these factories, factory sites and other buildings—a limited number—which we offer for immediate sale direct to manufacturers, at attractive terms. We are employing the most powerful and the quickest means of disposing of our peace surplus and of acquainting the public with the opportunities Hopewell offers. It will be a matter of first came, first served. Quick action is advisable.
