**Safeguarding Your Fuel Supply**

Large users of coal—railroads, traction lines, central stations and big manufacturing plants—find in the present unsettled conditions a source of anxiety. They must be certain that they have eliminated—so far as possible—all chances for failure in their fuel supply.

To those having their own mines we offer engineering and management service that reduce cost of production as well as giving assurance of supply.

To those contemplating the purchase or sale of coal mines we offer services as independent appraisers.

Having developed our business from small retail coal merchants, 36 years ago, to operating twenty-eight mines with an annual capacity of thirteen million tons, we believe we have a knowledge of fuel production and distribution that you will find of value to your company.

If you have a fuel problem, we will be glad to assist in its solution.
