Lucy Begins to Get Well

READ THIS FIRST

Julia Grant seemed fated not to marry Dan Carson. The first time they were engaged he jilted her, and then after she had taken him back, Lucy, Julia's younger sister, but a bad accident just a few days before the wedding. There were other reasons that should have prevented the marriage, the fact that Julia had not weighed her feelings sufficiently and that she discovered after she had given her promise a second time to Dan that all her love had been given over to John Norville, the head surgeon at the hospital where after her first disappointment Julia had gone to study nursing.

NOW GO ON WITH THE STORY

THE hours that followed were filled with anguish for Julia. Lucy had had a bad concussion, and brain fever developed. She babbed constantly of Dan. Sometimes she would speak quite rationally and plainly, and Julia's cheeks would burn as she felt the eyes of the old doctor upon her and knew that Lucy's meaning could not be misunderstood. In those days Julia was grateful that there was no one else to hear. She slept on a cot at the foot of Lucy's bed and waited on her night and day.

Then there came a day when Lucy woke up and there was no longer that wild hunted look in her eyes. The wound on her head had faded to a brief scar, and she was very weak and white, but the fever had gone and she knew Julia.

She put her thin little hand up to her head and asked, wonderingly, "Have I been here long?"

"Very ill, dear," Julia said tenderly, bending over her. "But you're going to get well now."

Lucy was trying to remember. "What happened?" she said finally. "You tell, don't you remember?"

"Oh, yes, I was hanging pictures. How long have I been sick?"

"About three weeks, but don't talk now, dear; go to sleep." And Julia pulled the covers up tenderly, waited a moment while the blue-veined lids fluttered down wearily and then tipped downstairs to tell the family that Lucy had actually known her.

"It was on this day of Lucy's first rational conversation that the old ache returned to Julia's heart. Up to that time she had been too busy giving herself, tiring herself out in services for Lucy. Now that Lucy was going to

get well, she wondered what would happen to straighten out the tangle of her life and her sister's. What a farce it would be again to set a date for her own and Dan's marriage. How could she face anything like that now?

That night Dan came upstairs to see Lucy. He carried a long florist's box in his arms, filled with pale pink roses, and Julia arranged them in a tall vase and gave Lucy one to hold in her thin fingers.

Lucy looked at Dan with something of the old childishness gone from her eyes and he looked at her with a new understanding in his. She was so small, so frail, so sorely in need of protection. It seemed as though some one ought to look out for her, to see that nothing ever happened to her again.

She smiled at him weakly and gave him her other hand. Dan touched his lips softly to the white fingers.

Julia stole out of the room and into her own. If only, oh, if only it could come out all right for Dan and Lucy. If

things could take that course and she could be left alone! The thought was wonderful, too wonderful for her actually to believe that it could ever come true.

(Tomorrow, Lucy's attitude toward Julia, and the result.)

Wrinkles May Be Easily Coaxed to Leave

NEITHER tiny lines nor deep creases are always indicative of age but are always found when the skin is abnormally dry. Such skins crave a liberal supply of some oily preparation—something that will make up for the natural deficiency. Tests in more than half the Beauty Shops have proved beyond doubt that any wrinkles may be made lighter and many may be entirely obliterated by using

MARINELLO Tissue Cream

The Tissue Cream should not only be applied at night but also every time during the day that the skin feels dry and drawn, applying it freely until the surface is well covered.
