Approved by physicians

IN the production of its milk, the Walker-Gordon Laboratory Company applies the rules of cleanliness as doctors know them. Doctors who prescribe Walker-Gordon Milk for infants approve their methods of producing table milk that is clean, digestible, pure-even under the microscope.

Bacteria cannot live in the intense heat in which bottles and pails are sterilized at the Walker-Gordon Farms. Dust cannot rise from barn floors that are scrubbed before milking time; it cannot stay on cows that are washed and re-washed before the milking begins; the milkers' hands cannot carry contamination when they are repeatedly cleansed.
