Ruth ego. President Harry H. Frage said today, according to word from Boston.

'I sold Ruth for the best interests of the Boston Club.' he explained of the Boston Club. The Ruth had been turned down last summer. This apparently was Colonel Ruppert's way of saying that the sale money was well over the six figures.

This is the highest price ever paid for a ball player in the history of baseball. Joe Jackson was secured by the Chicago White Sox in 1915 at the estimated price of \$70,000. Eddie Collins brought \$50,000 to the A's from Chicago white Sox in 1915 at the estimated price of \$70,000. Eddie Collins brought \$50,000 to the A's from Chicago, and the Indians paid approximately \$55,000 for Tris Speaker.

Ruth is under contract now with the Boston Club to play for \$10,000 a season, but recently he announced when he was posing before the camera in California that he would not be in uniform this coming year unless the figures was manager of the Red Sox, when he onesed shot for the day's toil:

Business Manager Igoe horns in with
the announcement that Ruth has inrested a small portion of his baseball
fortune in the cigar business in Boston and naturally would like to be close
to watch his money developing.

Harry Frazee, the Boston president,
gives as his reason for the sale the
fact that Ruth made Boston a oueman team. Of course, the \$125,000
bid nothing to do with the sale.

Frezee would not divulge the amount
received for his home-run king, but
admitted that it was stupendous and
that only the New York Club could afford to pay such a price. The money
received, be said, would be used to
purchase much-needed strength for the
club.

Do You Know That Hudson Builds the Essex?

But Through Sheer Merit Alone Essex Made Its Thirty Million Dollar Sales Record

Essex success has not been accidental. No one doubts its right to the position it holds.

On the Cincinnati Speedway a stock chassis Essex set the world 50-hour endurance mark, of 3037 miles, under American Automobile Association supervision. Another stock Essex holds the unequalled 24-hour road mark of 1061 miles.

But how many know why Essex in its first year revealed qualities more mature, more evident of the influence of long experience, than is commonly found in cars even in their third and fourth year.

You will recall the Essex was announced one year ago without one word as to the identity of its builders. Not a claim was made for its performance.

You were asked to go look at it, take a ride and form your own opinion. The Essex, we said, would have to speak for itself.

Now that it has established itself, we reveal why Essex has all the qualities of cars of long development.

Was Designed by Hudson Engineers

They conceived it as they developed the Super-Six. All they learned about endurance, they incorporated

in the Essex. They gave to the Essex the power that has made it famous in all quarters. Its speed is the result of what had been learned in making the Super-Six winner of all worth while speed records.

The Essex can never be all that the Super-Six is for they are totally different types.

But the Essex does bring quality and performance to a class field that was unknown.

The former owners of large costly cars that have adopted the Essex have not been Hudson users. They have come from other cars, cars that fall short of the Super-Six in all particulars save size and cost.

The Essex appeals to such users because of its nimbleness. They like the way its performance compares with that of the Super-Six. You can see this on every hand. The two cars in any community that are most prominent because of their performance ability are the Hudson Super-Six and the Essex.

Essex Did Not Need Hudson's Endorsement

Think of the advantages Essex has had. What ordinarily would have required years to perfect was made possible in the very first model.

That is why 20,000 are now running, why more than \$30,000,000.00 was paid for Essex cars in ten

You have not needed the Hudson endorsement to understand Essex performance.

Essex has won its own way. Hudson gave it full benefit of the experience of its engineers and the ability of its manufacturing organization. Its name was not needed.

Now Hudson takes the same pride in acknowledging its kinship to Essex that a father might in speaking of his son who on his own account had made good,
