

# INSPECTION WARMS HIS INSPECTORS

## Director Delivers Ultimatum to Men in Street Department on Truthful Reports

### DUTY TO CITY, HE SAYS

## Health Director Plans Attack on Dread Diseases

Five "to a certain extent preventable diseases" will bear the brunt of the Public Health Department's attack during the coming year.

The maladies—pneumonia, heart disease, tuberculosis, kidney trouble and cancer—were responsible for 13,000 deaths, half the city's total, last year.

Educational work carried into the schools and into the homes will be one important weapon in the fight. Director Furbush said that the street cleaners who were summoned before him today.

All Know About Bad Weather

Several of the men assembled said that bad weather interfered with cleaning the streets.

There was a deafening silence. No responses were presented.

Director Furbush stated that the only asset which would keep them in the city's service.

Director of Public Health Furbush will wage war on five "to a certain extent preventable diseases" that are responsible for 13,000 deaths, half the death total of the city last year.

# ANY PAPER WILL DO, WOMEN ARE TOLD

## No Difference Between Republicans and Democrats, Citizenship School Students Hear

### TO HOLD MEETING TONIGHT

"Make your decision as to which is the best paper to read, then hold your own shut and go in."

Mrs. Nancy M. Schoenmaker outlined the meeting and the prominent political parties in the lesson.

"The principles of state rights and federal control disappear under the Democratic and Republican parties as there is but one principle, and that is, 'I will do as I please,'" declared Mrs. Schoenmaker.

"There is about as much difference between the Democratic and Republican parties as there is between Tweedledee and Tweedledum," declared Mrs. Schoenmaker.

"The principles of state rights and federal control disappear under the Democratic and Republican parties as there is but one principle, and that is, 'I will do as I please,'" declared Mrs. Schoenmaker.

"The principles of state rights and federal control disappear under the Democratic and Republican parties as there is but one principle, and that is, 'I will do as I please,'" declared Mrs. Schoenmaker.

# IMPLACABLE RAIDERS SEEK EVEN CELESTIAL MOONSHINE

## "High-Efficiency" Rocket Designed to "Light Up" Man in Moon—"It's a Long Way to Luna," Comment Scientists

Shortly after January 16 scientists are going to pull a raid on the greatest moonshine joint of all—old Luna itself.

"For some time there has been a feeling that the Milky Way must have a 'stick' in it and be some sort of an organ. Whisky and sugar and milk are high enough to grace a celestial punchbowl."

Now the scientists, led by Prof. Robert H. Goddard, of Clark College, are going to get in touch with the moon by means of a new high-efficiency rocket.

Whether any instrument aimed by man will ever span the 240,000 miles that separate us from intercourse and competition with the moon is not yet settled, but the Smithsonian Institution, Washington, has just announced the invention of a new type of multiple-charge high-efficiency rocket for exploring the regions of the upper air that would lead to some sort of communication with the nearest of the planets.

The bulletin of the institute comments on the interesting possibility in this way: "As an interesting speculation is the possibility of sending to the surface of the dark part of the new moon a sufficient amount of the most brilliant flash powder which, being ignited on impact, would be plainly visible in a powerful telescope."

Prof. Eric Doolittle, of the University of Pennsylvania, does not feel that the new rocket will reach the moon, though he admits its usefulness in exploring those portions of the atmosphere some 200 miles away from the earth.

You must remember, said Professor Doolittle, "that this rocket is now known to be able to travel 200 miles into the air, but that the moon is 240,000 miles away. It would take this rocket six and one-half minutes to cover 230 miles, but traveling at the same rate of speed, it would not reach the moon in less than two or three hours."

Dr. Henry Leffmann, of the Franklin Institute, also expressed doubt about the moon with any such apparatus. He agreed that the new invention was extremely valuable in studying the regions of the upper air within several hundred miles of the earth.

# TAKING OF CENSUS NEARING THE END

## 100 Districts Completed—Little to Be Done in Others. Plenty of Workers

### DIPLOMACY GOT RESULTS

Census enumerators have made a big stride toward the completion of their work in Philadelphia.

In 100 enumeration districts, it was said today, the count has been completed. In many other of the 1836 districts the work is virtually finished, with only a few loose ends remaining for the enumerators to attend to.

One of the peculiar things about the taking of the census here is that Supervisor Keegan has a superabundance of available workers, while the general run of employers have had to scour the city for efficient men. Mr. Keegan said today that he had a list of 5000 men and women from which to pick the 1836 needed.

Even in the foreign district he has succeeded in getting competent enumerators.

Native to Work Chinatown  
In Chinatown the work is to be done by H. H. Chew, a Chinese student at the University of Pennsylvania.

Mr. Keegan has arranged to make the count in a methodical and painstaking way, which will save the other enumerators from the necessity of going into the chop suey places and talking "pigeon English."

From his preparatory efforts there are indications that Chew will complete his work as swiftly and quietly as the best of Mr. Keegan's men.

Just when the work in all of the districts will be finished could not be told today, but it is expected in Mr. Keegan's office that the last reports will soon be sent in.

What Diplomacy Accomplished  
Enumerators report that they have not with little difficulty in their work. Nearly everybody in Philadelphia has been ready to help them.

At another house a man drew a revolver and threatened to shoot. The enumerator, instead of calling the police, talked to the excited man until he put away the weapon and eagerly gave the desired information.

One enumerator tells a story, vowing that it is as true in 1920 as it was a long time ago. He asked a woman what was the occupation of her son-in-law and she replied:

"He is a chifftioner."

Magistrate Meekery, who said the man was acting detectively, was not so sure. He returned to the house and surrendered.

After he had surrendered, he said, the detectives attacked and beat him. He exhibited his bloodstained garments in proof of his charge.

"I was on the police force for nine years," he told Magistrate Meekery. "But I never held up a prisoner in that way and I never knew Reimer, who was attacked and beaten in his own house."

Magistrate Meekery held Gilbert for further examination.

The story told by the detectives was that as they passed Gilbert's house they saw a man who, they thought was Reimer, and they entered the house and knocked on the door of the room occupied by Gilbert. They said that Gilbert opened the door and mugged a revolver twice at them. They denied that they had used more force than was necessary in making the arrest.

Coast G. O. P. Chiefs Great Hays  
San Francisco, Jan. 12.—(By A. P.)—Republican leaders from California, Oregon, Washington and Idaho today greeted Will H. Hays, chairman of the Republican national committee, and his party, including several national Republican women leaders.

HELP WANTED—MALE  
OFFICE EXECUTIVE, capable for a genuine automobile insurance exchange, fully or partially equipped with financial backing, a splendid opportunity for a man who is looking for a job. He should be able to sell and increase field in strict confidence. Address: 1000 Locust Street, Philadelphia.

DEATHS  
MRS. POST—Mrs. Charlotte R. Post, Jan. 11. Aged 78. Buried at Mt. Airy.

RECOVERED—The body of a man, who was missing for several days, was recovered today near the city.

# PARK GAMES' CASE ARGUMENT HEARD

## Supreme Court Will Decide Churchman's Appeal on Sunday Pastimes

### TEST FOR COMMISSION

The State Supreme Court today heard argument and reserved decision on an appeal by a group of churches and Sabbatharian associations against the order permitting games in Fairmount Park on Sundays.

The order was made by the Fairmount Park Commission. A suit in equity was filed in Common Pleas Court No. 5 asking that the commission be enjoined from permitting baseball and other games in the park.

When Judge Staake refused to grant the injunction, an appeal was carried to the Supreme Court.

Elton J. Buckley argued today on behalf of the Philadelphia Sabbath Association and other complainants and the Fairmount Park Commission was represented by George Wharton Pepper.

Mr. Buckley maintained that the suit was not aimed at the playing of the game, but at the Commission's right to permit games on Sunday.

Mr. Pepper reasoned that the games were not a violation either of the letter or of the spirit of the so-called "blue laws," unless they became a nuisance, constituted a breach of the peace or violated the rights of others.

Referring to the appeal of "Clement H. Congdon," fined for playing ball on Sunday in the park as a test case, and now pending before the Superior Court, Mr. Pepper stated that if Mr. Congdon's fine were upheld by that court that Mr. Pepper would advise the Park Commission to rescind its order permitting games on Sunday.

SOVIET "ENVOY" ASKS STAY  
Wants More Time to Prepare Testimony for Senate Subcommittee

Washington, Jan. 12.—(By A. P.)—A request for more time in which to prepare for his testimony was asked today by Ludwig C. K. Martens, self-styled ambassador of soviet Russia, through his counsel, Thomas W. Hardwick, who appeared before the Senate foreign relations subcommittee with Sauter Nuorteva, secretary to Martens. As a consequence the subcommittee's hearing will not get under way before Wednesday.

Chairman Moses announced that the subcommittee would ask the Senate authority to employ counsel and indicated that the Department of Justice would be asked to make a detailed, probably Assistant Attorney General Garvan, who conducted the investigation leading to the nation-wide roundup of radicals.
