University Hygiene Professor Questions Reports Students Are III From Drinking It

THOUSANDS VISIT SPRING

Despite the fact that city physicians declare analysis of the city water discloses nothing which might cause sickness, complaints of illness said to be caused by the water continue to come from all parts of the city. Physician continue to warn their patients not to drink the water. The Fairmount Park spring is visited

The Fairmount Park spring is visited by thousands every day who are alarmed by the taste of the city water.

In discussing the matter today Dr. C. Lincoln Furbush, director of public health, declared fears regarding the water are groundless.

"We have been making analyses of the water every night and morning," he said, "and so far have discovered absolutely nothing that would lead us to believe the reported cases of sickness due to the water. In fact, some of the reports come from families where bottled water is used exclusively. Naturally, persons who became ill through some cause unknown to them are liable ome cause unknown to them are liable o attribute it to the drinking water, ue to its present unnatural taste."

Continue Analysis Doctor Furbush said the analysis of Doctor Furousi said the analysis of the water supply would be continued and every effort made to discover the cause of the sickness. When asked whether it was possible the water might be responsible for the reported spread of influenza, he cited cities in other sec-

tions of the country where the disease is nore prevalent. "You can readily see," he said, "that the disease is not confined to Philadelphia alone." to Philadelphia alone."
Yesterday it was reported that between 10 and 25 per cent of the students enrolled in the undergraduate departments of the University of Pennsylvania had been stricken with indigestion during the last week. The students, it is said, are inclined to regard their illness as coincident with the many rumors of an endemic of stometh and intestinal trou-
