Jerry also caught that look and knew what it conveyed; that it would be easy enough for them to repudiate the confession as a document forced out of them by threats, even if Jerry finally did obtain possession of it—that their word would count as everything against the discredited Black Jerry Malone.

Kenneth picked up his pen. What

worst the state can give you, but you're too smooth ever to get caught. My father knows these to be the facts and I ask him to testify to them. That's all you need to say, Harrison.

Now, just sign, your purpose on the detect. Slim longed swiftly at him, but Jerry, on the alert, caught him in a great hand that closed upon shirt front and coat lapels, at the same time covering Kenneth with his weapou. "I'd like to choke you, Slim Jack-

# Manufacturers REPLACE YOUR **WORN-OUT EQUIPMENT** APITAL and Labor are getting together. The paralysis of production caused

by unrest and the unreasonable demands of radicals is rapidly coming to an end. Machinery, the tool of production, unfortunately does not seem to be as quickly available as is demanded by manufacturers in order to reach the peak of production required by world conditions today. Deliveries of many lines of imperatively needed machinery and apparatus are too long to satisfy the immediate necessities of manufacturers. This emphasizes the importance of our function, to make machinery immediately available.

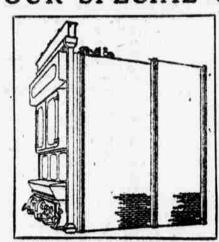

In previous messages to manufacturers we emphasized our service in furnishing equipment for immediate delivery from war plants, much of it new, some of it so little used as to be practically new. We urge manufacturers to get into immediate communication with us

whether in the market for additional equipment or contemplating changes in plants. The engineers and chemists of our organization are available to advise what can be done with your idle machinery or to interest other manufacturers to establish active industries in your locality.

# SOME OF OUR SPECIAL OFFERINGS

## Boilers

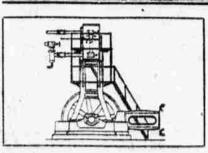

We are prepared to furnish all types of boilers, locomotive, return fire tube, or water tube of all makes, for immediate delivery. These are all good usable boilers, many of them according to ASME code, and all good for long life in the proper service.

### Turbo Generators

Deliveries on electrical equipment are being quoted for longer terms than most manufacturers can consider. We have a number of desirable turbo generator sets, both for AC and DC, which may meet your requirements. Write us.

We have ready for instant shipment large quantities of good usable pipe, cast iron, wrought iron and steel, both flanged and threaded. If you have been disappointed on deliveries quoted for pipe, send us your inquiries at once. The pipe we have available includes water, brine, ammonia and steam pipe.

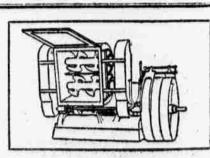

Refrigerating Machinery Including our purchase of the

entire surplus refrigerating equipment from the DuPont interests, we have moved more than one million dollars' worth of refrigerating machinery in the past twelve months. Nevertheless we have on our lists a comprehensive assortment of refrigerating machinery of all sizes, both steam and belt driven, some of it absolutely new and all of it in first-class usable condition, as determined by inspections of our refrigerating engineers. We also have a full line of accessory equipment, such as brine coolers, ammonia condensers, both atmospheric and double pipe, freezing systems, ice cans, etc. Our refrigerating machinery department is in charge of refrigerating experts.

### Stills

Much idle distillery equipment is being adapted to other uses in the manufacture of food products and in the chemical industry. We have available from former ammunition plants and discontinued distilleries, alcohol rectification units, also benzol and toluol stills and fractionating columns, which our chemical engineers are adapting for many other uses. Make your problem known to us and these men, experienced in fractionating and rectifying work, will advise you what we can offer to meet your requirements.

### Mixers

We offer a large assortment of mixers of all kinds, Werner & Pfleiderer, Day and other makes. These were purchased by us from smokeless powder plants and many have seen very little use. A large number have been re-located already and are being used by chocolate and candy manufacturers, chemical plants, cement and rubber works, and others. They can be adapted to many uses in every industry requiring the mixing of dry or plastic materials.

"THE ECONOMIST" Our house organ appears at frequent intervals and lists all our holdings in used equipment. Special attention has been paid to listings of vacuum evaporators, filter presses, surface condensers, tanks of all kinds.
