CHARTER PERPETUAL

Why we are better. equipped to build your factory

In Philadelphia, "The Workshop of the World," Steele stands foremost as the builder of industrial plants.

During the 55 years of our career as industrial constructors, we have planned, built and equipped many factories in Philadelphia-of all sorts and sizes-some of them among the largest in Philadelphia and in more than a hundred different lines of industry.

Our knowledge of Philadelphia's industrial conditions is derived from more than half a century of direct contact with its commercial development.

Our extensive experience in solving the building problems of most of its big manufacturing plants is the foundation of our present service to the manufacturers of "The Workshop of the World."

That's why so many out-of-town concerns, who contemplate building in Philadelphia, first consult Steele. Not only concerning construction problems, but also in reference to location, accessibility to water and rail transportation, power, water, labor, etc.

Fifty per cent of our business today comes to us unsolicited through clients whom we have satisfactorily served in this capacity. The other fifty per cent comes through our ability to prove in advance the dollars and cents advantage of our service.

If you are a manufacturer thinking of building, rebuilding, or adding to your plant, consult us. We shall be glad to explain to you the value of The Steele Idea of Industrial Construction. 'Phone or write for an interview.
