## As to the Prices on . Spring Clothing

GOur lowest price on Spring Suits is \$45from that they advance to \$100.

CYou will probably see clothing marked at lower figures, but we will not sell anything that is not made of a good quality standard fabric or that we cannot recommend to give satisfaction.

I The Labor cost on a suit of clothes represents about 40% of its cost, a considerably higher percentage than in former and normal years. The cost of the labor in a suit made of cheap material is practically the same as in that made of good fabrics -the result being that if you buy a "cheap" suit you are getting low-grade material with high labor cost, which is certainly a poor investment.

C Therefore, beware of the "cheap" suit-it is real economy to buy good clothes, because even if the initial cost is slightly higher than for the poorer sort of garments, the actual cost, when wear and tear are considered, is really less.
