

WILL GIVE BETTER SERVICE TO SHORE

Reading Officials Planning New Schedule—Pullman Tickets Both Ways to Be Had Here

MORE TRAINS TO BE ADDED

Improvements to the Atlantic City division of the Philadelphia and Reading Railway are contemplated following an inspection of the division yesterday by high officials. In the party were Agnew T. Dice, president of the company, and Charles H. Fawcett, vice president in charge of operations. A new general schedule is now being prepared and will be announced in a few days, Edwin A. Lewis, general manager agent, said today. Routine of the road was deranged by the diverting of traffic to wartime purposes. E. D. Osterhout assistant to the general passenger agent, said additional train service to the shore has been arranged for the Easter throng. Many of the trains, which were run as specials last year have now been made permanent.

A feature of the seashore service this year will be the sale of Pullman reservations, both ways in Philadelphia. Photographs must be placed on commutation tickets for those who travel back and forth between this city and the shore. For the present the wartime plan of using the Pennsylvania terminal in New York will be continued. Practical railroad men with wide experience in dealing with employees and who understand the railway wage controversy from both angles will be the representatives of the roads in the bipartisan wage board to be created under the new act which the lines went back to corporate operation on March 1. This assurance has been given by Thomas DeWitt Cuyler, of Philadelphia, chairman of the Association of Railway Executives, who said he expects the personnel of the board to be announced from New York tomorrow. There will be six representatives of the roads, and it is expected one of them will be an official of the Pennsylvania lines from this city. This, however, had not been decided, Mr. Cuyler said. It is probable, he added, high officials of the lines will make up the personnel of the board. Mr. Cuyler mentioned W. W. Atterbury, a vice president of the Pennsylvania, who, under the reorganized plan, is head of the transportation division as the type of man he desires to see on the board.

Husband Finds Wife a Suicide. Mrs. Anna McMullin was found strangled in the cellar of her home at 2717 South Seventeenth street this morning by her husband, James. She had a necktie tightly knotted about her neck. A call was sent for Dr. George Burton, of 1702 Oregon avenue, and he pronounced the woman dead. She was forty-two years old, and according to the husband has been sick and despondent. The couple have three children.

IRISH SOCIETY MEETS

"Fighting Imperialistic Government Not People," Editor Declares. "We are not fighting the British people, but the imperialistic government," the Rev. Norman M. Thomas, editor of the World of Tomorrow, declared in an address at the annual celebration of Martyrs' Day of the Irish Clan-na-Gael last night at the Academy of Music. The Rev. Mr. Thomas was introduced by Michael J. Ryan, of this city. Mr. Ryan was termed the "special Irish commissioner to the Peace Conference in Paris." Applause greeted the announcement that arrangements were completed for the welcoming of President Eamon de Valera at the Metropolitan Opera House next Sunday. Among the speakers last night was Mrs. Agnes Newman, sister of Sir Roger Casement, who was executed as a German plotter.

Woman Killed in Elevator

New York, March 4.—Mrs. Muriel H. Ford, wife of Ernest H. Ford, a London banker, died yesterday from injuries received when she was crushed in an elevator in the Hotel Majestic, Central Park West. Mrs. Ford was stepping from the elevator when the car started and she was caught between the door and the wall. Mr. and Mrs. Ford recently arrived in this country on a trip for the former's health.

RESEARCH BUREAU FOR WELFARE PLAN

Idea of Making House of Correction Curative, Not Punitive, Is Approved

WOULD REFORM PRISONERS

The Bureau of Municipal Research, in its weekly statement, issued today, sees the probability of a change of the city's House of Correction from a "punitive" to a "curative" agency under the Department of Welfare. "It is clear," the statement says, "to any one even casually familiar with the city's business that under the old charter, under the new, the main concern of the director of public safety was the police bureau. "Naturally the bureau of correction occupied a minor place in the attention of any director of the department. Moreover, those who shaped policy for the bureau of correction could not help but regard it largely from the police viewpoint, and it was hardly to be expected that the planning, patience

and knowledge could be brought to bear on the city's house of correction that would tend to make it, so far as possible, a curative agency, rather than one merely punitive. "With the wise provision in the new charter, however, that the Welfare Department be charged with the correctional activities, there is encouragement for the hope of a new dispensation. "There will be the time for giving major attention to this activity of our local government, and there should be the viewpoint of human service primarily, rather than that of the stern majesty of the law. "The director of the Department of Public Welfare has had introduced into Council an ordinance to consolidate the Bureau of Charities (in the Department of Health and Charities under the old charter) and the Bureau of Correction. This, it seems to us, is purely a matter of administrative expediency. In many cities these functions are united. "But a matter of great social significance, we feel, is the plan of the director of welfare to reorganize the House of Correction so as to make it function effectively and humanely as a public agency to save from hopeless ruin those unfortunates who have offended but who have not yet degenerated into hardened criminals. "To carry out this idea of making the House of Correction live up to its name it will be necessary to secure a legislative amendment that would enable judges to commit first offenders to the House of Correction instead of to prison.

Penologists Tell of Commitments to Prison. Penologists tell of commitments to prison tend to turn first offenders into recidivists or chronic criminals. "The director's appealing program has numerous other features. Foremost in interest among these are proposals for teaching trades to the men and women committed; for wholesome work much of it out of doors in quarry or garden; for entertainments and evening classes and for concentration on a purpose to salvage, so far as it can be done, the valuable human material entrusted to the department."

Women May Now Get "F. R. C. S." London, March 4.—(By A. P.)—At an extraordinary meeting of the Royal College of Surgeons in Edinburgh yesterday it was resolved that women should be admitted to fellowship in the college.

'SQUARE DEAL' P. R. T. PLAN

Lt. H. G. Milson Asks Elimination of Capital-Labor Mistrust. Elimination of suspicion and mistrust between employer and employee and a "square deal" for all are the basis of success of the P. R. T. co-operative plan. Lieutenant H. G. Milson made this statement at a luncheon of the Magister Builders' Exchange at the Bellevue-Stratford at noon, when he declared that the "do-less-want-more" type of man had no place in the present scheme of things. Lieutenant Milson compared figures to show that the traction company had

been elevated from a state of chaos in 1910 to an orderly and highly profitable institution in 1919, despite the vastly increased cost of operation. He attributed the attainment to co-operation of employer and employee. Dr. A. A. Mitten, son of T. E. Mitten, also spoke. "A series of luncheons for 1920 has been planned by the Builders' Exchange to bring building leaders in the city closer touch with a view of forwarding the \$150,000,000 building program for Philadelphia this year.

Special Service for Men A special service for men will be held in the Episcopal Diocesan Church of St. Mary this evening. The speaker will be the Rev. Bernard Iddings Bell.

PLAN MEASLES HOSPITAL

4000 Cases of Disease Reported Since January 1. The Department of Health is considering the utilization of one of the buildings of the Philadelphia Hospital for Contagious Diseases exclusively for measles. There have been 4000 cases of the disease since January 1, and health officials say there is no sign of an abatement. If one of the buildings at the hospital cannot be spared, it may be necessary to erect a new building to accommodate the patients. Dr. A. A. Cairns said that while 4000 cases of measles were reported, there had been at least 12,000 additional cases, not reported.

HOW CAN WE DO IT ?

We pay more for wheat, more for labor, more for taxes - but Shredded Wheat sells at about the same old price - very little advance on account of the war. How can we do it? We can do it because the volume of sales now reaches many millions of Biscuits per day. Considering its real food value Shredded Wheat is the cheapest food in the world today. It is 100 per cent whole wheat in a digestible form. Two Biscuits, with hot milk, make a nourishing meal for a few cents.

COST INCOME

Are you making ends meet?

In your business every increase in the cost of labor and materials you add to the price of your goods. This company has experienced all of the rising costs, but its rates are what they were before the war! We can no longer make ends meet! We ask only for what is fair—rates that take into account, just as do the prices of your goods, the doubled costs of everything. It's your service.

"Rain or shine, snow or sleet, IVINS' trucks are on the street!"

THE terrific snowstorms of February did not interrupt IVINS' delivery service. Many of our distributors saw service in France. After months of driving on shell-blasted roads behind the front, Philadelphia streets were no obstacle at all.

The "get-there" spirit that carried the Yankee doughboy from Chateau-Thierry to Sedan is your insurance that Ivens' Cakes and Crackers will always be fresh at grocers'.

The short rhyme above comes from a grocer who congratulated Ivens' distributors on being the first to break through the snow-blocked roads to Bridgeton during the February blizzard. The trade knows that IVINS and "reliability" are one, both as to service and as to quality of product.

A Ten-Day Tube of Pepsodent. Send coupon. Make this simple, pleasant home test. See for yourself the results.

6,000 People Daily

Start This New Teeth-Cleaning Method

All Statements Approved by High Dental Authorities

Teach Children to Employ It

When you see what Pepsodent does, teach the children to employ it.

Brushing is inadequate for saving teeth, and millions of mothers know it. The film will wreck them if you don't combat it.

This ten-day test will show you how to fight the film. It will point the way to whiter, safer teeth.

It will tell you how the children can avoid some troubles that you know.

See that they do it. There are few things more important.

Millions of teeth are being cleaned in a new way. And 6,000 new people daily are writing for a ten-day test.

Everywhere the results are seen in teeth that glisten—teeth with envied luster. Ask the owners and they will tell you that Pepsodent has done it.

But this means more than white teeth. Those careful people are fighting film, and film is the great tooth wrecker. Most tooth troubles are nowadays traced to it.

Film—the Chief Enemy

Film is that viscous coat which you feel with your tongue. It clings to teeth, enters crevices and stays. The tooth brush does not end it. The ordinary tooth paste does not dissolve it. So much remains to cloud the teeth and it may do a ceaseless damage.

Film is what discolors—not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Thus well-brushed teeth, as millions know, discolor and decay. And serious tooth diseases are alarming in extent.

Science Now Combats It

These facts have long been known. Dental science long has sought a way to daily fight film. But the only way seemed periodic dental cleaning to remove the film and tartar.

Now science has discovered an efficient film combatant. Able authorities have proved it by convincing clinical and laboratory tests.

For home use, the method is now embodied in a dentifrice called Pepsodent—a modern, scientific tooth paste. And, to show its effects, a 10-Day Tube is being sent to anyone who asks.

Make This Simple Test

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

This method long seemed impossible. Pepsin must be activated, and the usual agent is an acid harmful to the teeth. But a harmless activating method has been found. Years of tests have proved that. So now this active pepsin can be every day applied.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the fixed film disappears.

See the results, and our book will tell you how they come about. Then decide for yourself between the old ways and the new.

The test will be a revelation, and you owe it to yourself. Mail the coupon to us today.
