who cheered his eloquent and patriotic words to the echo, the splendid instrumental band of sixty-six happy young men and good women, after each piece they played, had to put their instruments up or down, a peg higher or lower, to get the pitch required.

As a rule, all of us are pitched too high, and, anyway, most of us need to be tuned up in some direction every day if we want to add perfect music to the harmonies of the day.

Take a look at those great freight elevators on both sides of the Store, loaded with new goods for Spring, coming down from the upper floors to put Spring blossoms of merchandise on our various stocks and to tune up the music of the new season just beginning.

and each hat was selected for some particular fashion feature.

There's a wealth of ribbons and fabrics, but ribbons are a predominating feature. You see them in huge, dashing bows, in fluttering streamers, in coquettish chin straps, on top of the hats and underneath them

It is to be a great season for fabrics also-for hats of taffeta, hats of satin, hats of crepe, hats adorned with filmy laces, hats made wholly of narrow ribbons; even cretonnes are pressed into service! Taffeta hats with organdie bands are another Paris idea

Paris approves both large and small hats this Spring. The large hats-are very large indeed, while the small hats often have some dashing bit of trimming-a huge bow, a perky wing.

Colors are bright and there is wide choice. Many rich, dark red shades Paris uses, many browns, jade and other greens, coral and white.

Quite new are the little car tabs, the fancy rosettes which are attached, in coquettish fashion, to the streamers and

look then.

Stain and Tartar Can Be Ended

They are due to film. Now you can daily combat that film and keep teeth whiter, safer and cleaner.

The ten-day test will prove this. The results are clear. And the book we send will tell the reason for them.

Make this test now. Millions have already done it. See for yourself the difference between film-coated teeth and clean teeth.

Your own teeth will tell you quickly what is best for you and yours.

All Statements Approved by High Dental Anthorities

asks.

Perhaps your teeth are clouded by a film. Most teeth are, more or less, save right after cleaning in a dentist's chair. The cloudy film looks like the teeth, and you think the teeth are clouded. But it is the film. Remove it and see how teeth look then.

That viscous film which you feel with your tongue is the cause of most tooth troubles. It clings to teeth, enters crevices and stays. The tooth brush does not end it. The ordinary dentifrice does not dissolve it. So it stays - much of it -and may do a ceaseless damage.

That is why so many brushed teeth discolor and decay. You leave the film, and that is the great tooth wrecker. Despite the tooth brush, statistics show that tooth troubles are constantly increasing.

How Teeth Are Ruined

That film is what discolors - not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. Dentists call the film "bacterial plaque." Those germs, with tartar, are the chief cause of pyorrhea.

Dental science has for years sought a way to combat this film. Periodic dental cleaning removed the film and tartar. But what was needed was a daily film combatant.

It has now been found. Convincing clinical and laboratory tests have amply

Ten Days Will

Look now at your teeth, then look in ten days. You will see what this new method means to you.

proved its efficiency. Able authorities endorse in, And now leading dentists all over America are urging its daily use.

For home use the method is embodied in a dentifrice called Pepsodent - a scien-

tific product. And, to spread the facts, a 10-Day Tube is being sent to anyone who

Now Millions Know

Now millions know by actual test what Pepsodent can do. Everywhere you see the results in whiter, cleaner teeth.

Pepsodent is based on pepsin, the di-gestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it, then to day by day combat it.

Pepsin long seemed impossible. It must be activated, and the usual method is an acid harmful to the teeth. But science has discovered a harmless activating method. And now this film combatant can be every day applied.

Pepsodent needs no argument. The results are quick and apparent. See what it does, read the reason, then judge it for yourself.

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the slimy film. Sce how the teeth whiten as the fixed film disappears.

Compare the results with your old methods. See the effects you never saw before. The test will be a revelation to you. Mail the coupon to us today.
