FRENCH AND AMERICAN, WOMEN'S CLOTHES FOR SPRING

`HE first thing to say about them is simply this—that they are lovely.

WANAMAKER'S

The second thing is that they are wearable.

Even before the war women were growing tired of agreeing to this or that fashion, regardless of its fitness for their own particular types; and the French, with their usual acuteness, have realized this and have produced gowns of an infinite variety

Variety, then, is the keynote of these new Easter fash-ions, both those from great Paris makers and those from the cleverest of American makers.

Among the Imported Garments Are

A Lanvin of oyster white crepe de chine, with rolled collar, rolled sleeves and rolled girdle, all embroidered with delicate traceries of tan and gold.

Another Lanvin-a slip-on Chinese coat of white radium with navy tricotine skirt, accordion pleated.

From Miler Soeurs comes a pink crepe de chine, piped with white and enriched with drawn work. Also a pink Georgette crepe with square neck, rows of tiny silk buttons and an old blue sash.

From Brandt a scalloped gown of coral duvetyne, with coral girdle and a standing organdie collar.

From Jenny a navy serge with a fine accordion-pleated overskirt which is caught in on a narrow skirt. The sash is of blue and white ribbon.

Charlotte et Germaine send a Chinese coat of navy taffeta embroidered with narrow strips of sand kid to match the pleated crepe de chine skirt.

Another Lanvin is a mauve organdie in apron effect over dark blue taffeta.

The Lanvin cape dress with its heavy old blue embroidery is a notable thing.

Other imports are enchanting lingerie frocks-blues, yellow and rose—one with shadow embroidery; and the silk fiber tricolette suits and chemise dresses which the French think so well of, the tricolette having gold or silver closely interwoven with the thread. Such dresses show the short sleeves which are almost universal.

Among the American-Made Gowns—

The Kirman is not only one of the finest and most typically Persian rugs, but also one of the most distinctive. Compara-tively speaking, there are few Kirmans in the United States and there are practically none commercially obtainable. The name belongs to rugs

woven in the Kirman district,

lying betwen the Desert of

Lut and the Arabian Sea. It is hard to be told that the prod ucts of this place are hardly "contaminated by European in-

fuence," but it must be sorrow-fully admitted that to this fact is largely due the fine char-acter of Kirman rugs. There used to be, and prob-

ably still is, a marvelously fine Kirman in the palace of the Shah at Teheran.
