Teeth Are Whiter

Millions of Them - Note Them Everywhere

All Statements Approved by High Dental Authorities

Wherever people meet now you see white, glistening teeth. It is clear that some change has occurred, for white teeth were never so common.

ing, has found a way to combat this film. Millions of teeth are being cleaned in a Convincing clinical and laboratory tests new way - in a way you'll adopt when have amply proved its efficiency. The method is now embodied in a you know it. This is to urge you to dentifrice called Pepsodent. With it are test it.

They remove the film

Teeth become coated with a film. That film becomes cloudy and the teeth grow dim.

Film is that viscous coat which you feel with your tongue. It clings to teeth. It not only dims their luster, but it works their ruin. Most tooth troubles are now traced to film.

The ordinary tooth paste does not dissolve film. A soapy tooth paste even makes it more clinging. So old cleaning methods have proved disappointing. Tooth troubles have been constantly increasing, until very few people escape them.

How the film destroys

This film is what discolors - not the teeth. It is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea.

Careful people, twice a year, have dentists remove the film and tartar. But in the meantime, between the teeth and on the teeth, it may do a ceaseless damage. The need is for a daily film combatant.

The New-Day Dentifrice

A scientific film combatant, combined with two other newlyrecognized essentials. Now advised for daily use by leading dentists everywhere. Druggists supply the large tubes.

Filmless teeth will glisten

Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how the teeth whiten, how they glisten, as the fixed film disappears.

The results are quick and apparent. Your mirror will show them.

Then remember that those glistening teeth mean far more than beauty. They mean cleaner, safer teeth. It means that film the chief tooth enemy - can be effectively combated.

This is too important to delay. Cut out the coupon now.

Compare this method with the method you employ., It will give you new conceptions of what clean teeth mean. Then you will not re-turn, or let your children return, to the ways which have proved so inadequate. The result may be life-long protection, such as former methods never could afford.

Science now combats it

Dental science, after years of search-

combined two other modern requisites.

So in three ways this tooth paste brings

Now leading dentists everywhere ad-vise it. Already millions of people have

seen the results of it. And in every com-

munity these users are urging other folks

Offered to every home

of Pepsodent. Get it and watch the results, then read the reason for them. Judge for yourself what this new-day method means to

Pepsodent is based on pepsin, the digestant of albumin. The film is albuminous matter. The object of Pepsodent is to dissolve it,

' But pepsin must be activated, and the usual

agent is an acid harmful to the teeth. So this method long seemed impossible. Science, however, has found a harmless activating method. Now active pepsin can be daily used,

and forced by the brush where the film goes.

Pepsodent brings two other results, to ac-cord with modern dental requirements. It ful-fills every need. But constant film destruction is its all-important action.
