

**DU PONT ATTACKS IMMIGRANT BILLS**

Measures, if Passed by Congress, Would Demoralize Industry, General Says

By the Associated Press  
New York, April 7.—The first national immigration conference ever held in America began here today to discuss naturalization and immigration laws, labor shortage, the exodus of immigrants from America and the cause of unrest among the foreign-born, with a view to formulating recommendations to Congress.

William H. Barr, president of the Inter-racial Council and spokesman for industry, and General Coleman du Pont, chairman of the board of directors of the Inter-racial Council, opened the meeting. A statement prepared by E. Meredith, secretary of agriculture, was read, in which he approved of any "legitimate effort to point the way in which the immigrant may be helped to become a thoroughgoing American."

"America is 4,000,000 men short as a result of the dwindling of immigration since the war," General du Pont said. "Thousands of immigrants are going back; other thousands are migrating to Canada, South America and Australia and other countries are making organized efforts to attract immigration. The United States is not."

"There are over 200 bills pending in Washington which, if passed, will shut out the future supply of immigrant workmen and will demoralize industrial and credit conditions in America. They will also have the effect of excluding immigrants who left this country following the armistice to attend to affairs in the home lands and who may want to return to America."

"The indiscriminate denunciation of the foreign-born which has been taking place in America is resulting in many of them leaving this country. It is resulting also in growing misunderstandings between native and foreign-born residents and in a general demoralization of industrial and social life."
