WANAMAKER'S

WEATHER Cloudy

There Is "a Good Time Coming" in This Store Tomorrow, Anyway

"There Is a Good Time Coming"

is an expression used by Sir Walter Scott in "Rob Roy" and it has always been a favorite saying of the Scotch people.

As soon as the Armistice was determined upon, on November 11, 1918, the whole United States took a long stride to bring on the

Good Time Coming

The deeply-to-be-regretted differences of our leaders in Washington have left us high and dry on the rocks of uncertainty.

The few rich people who can take care of themselves have had to bear the losses of depreciated Liberty Bonds by which the Government got money to win the war.

The millions of poor people who wrought and scraped together all the little money they had and took the Liberty Bonds have been the greatest sufferers by having to sell their Bonds to speculators who have made them lose an average of ten per cent of their earnings.

The Treasury of the United States must make up these losses by a provision to keep Liberty Bonds at par so that whatever is left in the old world will climb over through its owner for the United States Bonds, the best security in the world.

There is a good time coming, and coming soon, if we stand together and labor to bring it on.

The new sports jackets are all of wool jersey in two-toned and bright colors, and will be most attractive worn over sports dresses and sports skirts. They are in the popular length, have tuxedo fronts and narrow belts and are \$55.

Men, This \$18 London Derby Hat Has Real Value

Englishmen buy such hats and wear them for years, with an occasional retrimming. If they get broken they can be ironed into shape again and the felt can be worn clear through to the lining. In the average derby the nap wears off in time and the shellac shows through.

Lincoln Bennett & Co., of London, make these derbies as they make silk hats, on a "gossamer" body and on a form. Other derbies are made by soaking the felt with shellac and putting it into an iron mold.

These fine London hats are also absolutely correct in style.

It is well to know that back of such a variety of weaves, patterns, color effects and styles there is such good and dependable quality.

This Curious Picture Shows You One of the Most Interesting Things in the Store Today

It is an iceless refrigerator and its operation is rather amazing. It is called THERMONOR, and is simply a white earthenware crock, very porous, working on a principle that is as old as history itself.

The crock is soaked in water for three minutes and then it becomes a refrigerator for three days.

We have made some very careful experiments with it to find out how it would keep fruit and meats and milk and it actually does keep them nearly as cool as the average refrigerator does.

Set it in the draught of a window and it will attain an especially low temperature. If you want to "rush it to the limit" turn an electric fan on it for a little while.

It comes in various sizes for various purposes. The milk bottle Thermonor at \$2.75 is a little wonder. It fits over a quart bottle of milk and it keeps it cool and protects it.

Model No. 3 having an inside diameter of about 7 inches is \$4.

Model No. 1, shown in the picture, has an inside space of about 12 inches in each direction. It is \$6.

Model No. 2, the largest size, is a practical family refrigerator and its weight is only 24 pounds. The price is \$7.50.

It looks as if the Thermonor would solve the ice problem of small housekeeping establishments and even in some large ones during the coming summer.
