

MEXICAN REVOLT SPREADS RAPIDLY

At Least Four More States Now Added to Sonora in Fighting Carranza

U. S. REMAINS PASSIVE

By the Associated Press
Washington, April 22.—Reports both to the State and War Departments today continued to support the unofficial dispatches that have told of the rapidly increasing area of revolt in Mexico. Administration officials studied them carefully but without betraying any indication that the position of this government would be other than that of an observer.

The movement begun by the secession of Sonora has gained the support of at least four other states, the adherence of various groups of federal forces and the promises by Villa, Manuel Palmar and one or two other minor rebel chiefs that they will join in the fight on Carranza, the reports showed.

So far as could be learned here Carranza has made no overtures to the American government for assistance, either directly or indirectly. The rulings which have prevented his government from getting arms and ammunition in the United States are still in effect. However, a request for permission to import war materials would cause no surprise. The presence here of General Salvador Alvarado as the official representative of Alvaro Obregon, accepted leader of the new revolt, has not brought from the administration any sign of its willingness to recognize the belligerency of the anti-government group.

One small hope of an adjustment of the situation in Mexico was offered today in the announcement that a mission from Mexico City was on its way to Sonora for a conference with the leaders there. Members of that mission were reported to have held a conference with Carranza, but here it was regarded as doubtful if the secessionists would listen to any proposal made. Already, it was pointed out by those who have watched the growth of the movement, the revolt has spread over such territory and gained such support not only from partisans of Obregon, but from those who have been in the field for many months as ordinary rebels, and by units of the federal army, that even

its leaders would have difficulty in checking it.

Agua Prieta, Sonora, April 22.—A conference between General P. Elias Calles and eastern military leaders of Sonora and the reported approach of a federal mediation commission were the outstanding features today in Sonora's secession movement. Calles was expected last night, but his arrival was delayed.

Meanwhile indications of a pending attack by Carranza troops on the Chihuahua boundary was not lacking. General J. M. Pina said a federal scouting party had been reported near a pass close to the American border. State troops have been dispatched to guard that as well as all other passes in the mountains separating the two states.

APPROVE P. R. BOND ISSUE

New Jersey Utilities Commissioners Grant Rea's Request
Trenton, April 22.—(By A. P.)—The New Jersey Public Utilities Commission today approved application of the Pennsylvania Railroad Co. for issuance of \$50,000,000 general mortgage bonds. Samuel Rea, president of the road, appeared before the commission Tuesday and requested authority to issue the bonds, which were made necessary, he said, because of discontinuance of improvements while the roads were under government control.

Nearly \$500,000 of the proposed expenditures will be made in New Jersey this year it was announced.

Fire Hits Lancaster Plants

Lancaster, April 22.—Fire and water (valued \$200) damaged last night the big planing mill of Draper & Co. and the Musser Umbrella Co. plant following spontaneous combustion in a box of celluloid.

'AMERICAN LEAGUE' BRUM'S NEW PLAN

President of Uruguay Would Unite All Nations of Western Continent

MONROE DOCTRINE PRAISED

By the Associated Press
Montevideo, April 22.—Formation of an "American league," on a basis of absolute equality between all American nations for common action against aggression threatening any one of them from outside nations and for arbitration of inter-American disputes, was proposed by Dr. Baltazar Brum, president of Uruguay, in addressing students of the University of Montevideo last night.

As a step in the formation of such a league, Doctor Brum declared other American countries should make a declaration similar to the Monroe Doctrine, placing them on the same footing as the United States for joint action against European aggression and to secure the solidarity of the American continent. He said the proposed league should be formed without prejudice to adherents to the League of Nations.

UNCLE WAS 'CROOK,' AUNT A 'VAMPIRE'

N. J. Man, Sued for \$50,000, Testifies Girl Revealed Her Family Skeletons

COULD NOT MARRY, HE SAYS

New York, April 22.—William Russell Smith, of Tenafly, N. J., defendant in Miss Lillian Phipps's \$50,000 suit, told on the witness stand in the Bergen County Circuit Court at Hackensack yesterday why he broke off the engagement.

impossible," declared the defendant, whom Lawyer Frank McDermott, counsel for the plaintiff, saw fit to call "Old Bill" Smith.

Smith admitted he had written a love letter to Miss Phipps in which he asked, "Do the birds tell you I love you?" He also said he had telephoned to Miss Phipps to tell her the engagement was broken.

On cross-examination Smith said that in May and June he was much in love with Miss Phipps, whom Lawyer McDermott asked: "When this beam of love first smite your heart?"

Mrs. Madeline Roos, of Astoria, Ore., threw a bomb into the court when she declared hotly that Miss Phipps had told her the Van Loan "had skinned her parents to the bone as they had done many others."

Are you puzzled whether to rebuild your present plant or build a new one?

A manufacturer of world-wide repute called us into consultation and said:

"We need more production. Our three factories, now running at full capacity, cannot produce all the goods we have orders for."

Then he asked us these questions:

"Shall we build another factory to take care of the extra demand?"

"Shall we rebuild one plant or all of them?"

"Or would you advise building one big plant and combining all our factories into that one?"

These are the kind of problems Steele is especially equipped to solve.

Our industrial engineers made a complete study of our client's manufacturing methods and processes. Our construction engineers investigated the condition of the factories—their power arrangements, lighting facilities, etc.

We studied every foot of the three plants and every step in the manufacturing processes.

Then we submitted a plan which proved to this manufacturer that we could solve his problems satisfactorily and economically.

After we had thus proven the dollars and cents value of our service a contract was signed under which we planned, designed and built his plant, purchased and installed machinery and equipment, tested the operation of each building and turned the plant over to him complete, ready to operate.

This kind of service to clients illustrates the broad scope and inclusiveness of The Steele Idea.

We are not only experts in designing and constructing fine buildings, but we are specialists in manufacturing methods and plant operation.

We plan and construct factories that save the owner money—because they are planned right in the beginning.

If you are a manufacturer with similar or other building problems that puzzle you, consult us. We shall be glad to prove to you as we have proven to hundreds of other manufacturers the value of our services. This does not obligate you in any way. Write or phone for an interview.

'The Men You Trust Say This About It

THE PHIPPS INSTITUTE needs \$100,000 by May 1 to prevent its being closed then, when its treasury will be empty.

THE PHIPPS INSTITUTE, 17 years in existence and part of the University of Pennsylvania, seeks to eradicate tuberculosis by discovering a cure, or a method of prevention.

THE PHIPPS INSTITUTE asks you to invest in health by giving what your means allow to keep the Institute open.

THE MAYOR and the Director of Public Health yearly spend millions of your money, and you trust them. Read what they say of The Phipps Institute.

Mayor J. Hampton Moore—A few moments ago the Mayor attended a function at another hotel where a drive was being made for an institution in New England. He has been asked to speak at meetings where funds were being requested for foreign countries, people in distress elsewhere, those afflicted far, far away from quarters of Pennsylvania, even of the United States, and he came here feeling he could say in good faith that the time seems to have arrived when some of these drives should close just because they are running their course, because the charitable purse is almost exhausted. *But the time has not come when local institutions cared for by our own people, those at our own door like The Phipps Institute, should be neglected.* The time has not come when out of our bounty and the bigness of our heart, extending out all over the country, all over the world, in its desire to be helpful, we should forget pleadings, if not actual want, that lies at our own door.

I know only the human side of this Institute. I have no knowledge of its scientific efficiency. I know the human side of it because I see the people as I come from my home wandering toward this institution. I see the halting step of the unfortunate; the negro, the Jew and the Gentile—always the poor, going toward this one ray of hope, this one chance for recovery. And on the inside there are faithful officers, physicians, specialists and the faithful nurses doing their part.

I do not know how much money this Institute needs. If it were a million I would say, having attended many other meetings of this kind for many other purposes, that that million could not be better bestowed than upon this particular Institute.

Dr. C. Lincoln Furbush, Philadelphia's Director of Public Health—The activities of the Henry Phipps Institute for the Study, Treatment and Prevention of Tuberculosis for the past sixteen years have been of unusual benefit to every one interested in advanced methods applied to tuberculosis as a municipal problem.

This institute has been a pioneer in tuberculosis work in the United States and has been of particular assistance to the Department of Public Health and Charities of Philadelphia.

The scientific character of the work, together with the practical application of improved methods of field work among the tubercular poor, deserve the highest commendation.

Every effort should be made to provide substantially for the continuance of the Henry Phipps Institute. The City of Philadelphia particularly will need its help and co-operation to further the progressive health program of the Department of Public Health.

The Family of Henry Phipps Pledges \$500,000 toward a \$3,000,000 endowment fund. CONTINGENT upon the remainder being subscribed. When this gift will become available is, of course, problematical. The gift does not obviate the necessity for paying current expenses after May 1, when the Institute's treasury will be empty. \$100,000 must be had to keep the Institute open until an endowment is obtained.
