Keeps Hair Curly in Most Trying Weather

You needn't worry about damp or winds weather spolling the wavy appear-ance of your hair if you use the silmer-ine curling method. And you can dance all evening without having your tresses stringing all about your face.

If you've never tried this simple method by all means procure a bottle of liquid allmerine from your druggist and follow the accompanying instructions. It will enable you to have just the prottiest waves and carls, so natural prettiest waves and curls, so natural looking no one will guess they were artificially produced. The curliness is quickly acquired and lasts considerably lenger than where the heated tron is used. When the hair is combed out it will be delightfully soft and flufty. The life, lustre and beauty of the hair are preserved by the use of this harmless product. Therefore it is also prized as a beneficial dressing for the halp. It is quite pleasant to use and leaves no sticky or greasy trace.—4dv.
