Defends the Family

Defends the Family

To the Editor of the Evening Public Ledger; Sir—The papers of April 30 gave reports of an address by James M. Beck, of New York, delivered at the annual convention of the National Hostery and Underwear Manufacturers. In these reports Mr. Beck is quoted as saying; "Organized labor has already accomplished the overthrow and defiance of the family? Who made the family the foundation of the state? They by the foundation of the state? They accomplished the overthrow and defiance of the government, and made a war of principles of starvation which seven the state? They be complished the overthrow and defiance of the government, and made a war of principles of the survation which seven the stat he attention of the public a wonderful we theory, in which, in her enthusiasm has more and to prove to the public how successful it has been she has else had ego of her own nature.

Having disclosed so much of her insees and ego of her own nature.

Having disclosed so much of her insees in the first place?

Does she feel that she, as an individable has no reaponsibility whatever oher fellow beings? Were laws made, oher fellow beings? Were laws made, oher fellow beings? Were laws made, ease customs formed to suit her pleasure? Must everything be done for her envenience, and is she to give nothing? For conception of modern marriage "as he most sacred felationship which has breakfast cloth, stale with soft-boiled gratains," is surely a picture to stir fancy.

stains, is surely a picture to attract fancy.

fancy or we to go through life thinking of ourselves, our own picasures, own success? Does nothing else mattract apparently is Fannie Hurst's of life. If she is right, then why thousands of people given their lives so that others may live betas was recently evidenced in the at war? Surely they had a different husband, I believe him be-

wond an opinion, and would rather hear what others have to say about him.

Labor's Right to Organize To the Editor of the Econing Public Ledger:

behind them years of trial and experience.

In the second place it is the height of folly to think of destroying organized labor. The story of the wrongs of labor in the past is one of the darkest pages of history. The efforts on the part of labor to profect itself and secure a standing in society is one of the brightest pages of history. In this struggle labor has often stumbled and sometimes has struck out blindly. But as every one knows, whatever gains have been made in the status and treatment of labor have come in and through the efforts of labor itself. Labor must organize; it will organize. And the churches, in common with all forward-looking people, recognize the right and duty of labor to organize.

Mr. Beck ought to know that labor

own way in this country. We do not prorget what Roosevelt has said on this question.

This address of Mr. Beck betrays an utter blindness to the great movements of our time. We might as well recognize the fact that a new spirit is at work in the world. The working people of the world have grown tired of autocare the world have grown tired of autocare and a work in the world. They are determined to have a voice in the affairs of society and the things that concern their lives. They are determined that democracy shall be not a mere dream, but a working reality. We cannot resist this movement; we ought not try to do it. The shoulder of God is behind the rising tide and democracy is as inevitable as tomorrow's sunrise. The wise thing is to recognize this fact, to understand this movement, and then to join with all forward-looking people in giving this movement wise leadership and right direction. Organized labor will continue; we might as well reckon with that fact. The only question is whether it shall be a wise and progressive movement or whether it shall be a radical and destructive movement. The present organization of labor is the one thing that stands between the worker and the killing pace of modern industry. And the present organization of labor, defective and mistaken as it sometimes is, is the one thing that saves society from radical agitators and destructive revolution.

SAMUEL ZANE BATTEN.

SAMUEL ZANE BATTEN.

has not accomplished the destruction of government. It is true that labor has grown tired of being exploited by politicians and ignored by government. It has determined to make its needs known and have its welfare considered. Every one knows that capital for decides has had things practically its own way in this country. We do not forget what Ropsevelt has said on this question.

This address of Mr. Beck betrays an utter blindness to the great movements of our time. We might as well recognize the fact that a new spirit is at work in the world. The working people of the world have grown tired of autocapital than the provide the fact that a new spirit is at work in the world. To the Editor of the Evening Public Ledger. Sir—There is nothing new about keep-ing your own name. Who ever heard of Mrs. E. Adam in the Garden of Eden?

Penn Newspaper Enlarged

The Pennsylvanian, the daily paper the University of Pennsylvania, ap-Wants Mr. Palmer Removed

To the Editor of the Epising Public Ledger:
Sir—Just as a citizen who hasn't quite lost the power to think I want to raise my feeble voice concerning the latest exploit of A. Mitchell Palmer. I refer to his hysterical announcement of the May Day plots. It bore all the earmarks of a piece of manufactured political propagands. If the outrages failed to

#### Is that my car?

### Oldsmobile Renovating Service

800 N. Broad St.

This question was asked by a man who drove his car here last Monday with the fenders smashed into a shapeless mass and the body badly dented. When he called for his car Friday he marveled at the fact that every trace of the smash-up had been removed.

Every phase of this work is done right here in our own plant by trained experts, which enables us to effect for you a saving not possible where work has to be sub-let, as is the case with the average repair shop.

## Make Your Shoes Last

You make your shoes last as long as you can nowadays. You can do this at the least expense by wearing Korry Soles. They last twice as long. That means re-soling half as often. A real expense cut in two. Furthermore, they are waterproof and won't slip on wet pavements.

If your dealer does not have shoes with Korry Soles—and it is worth your while to inquire when you buy your next pair—see that your repair man puts them on the first pair any of your family has re-soled.

# Korry-Krome

They are as good for dress shoes as they are for work shoes; as practical an economy for women's shoes as for men's, and perfect for romping children.

GENUINE LEATHER SOLES

Korry Soles are tanned by the J. W. & A. P. Howard Company, of Cerry, Pennsylvania. They are used by reliable shoe repair men. If yours does not have them, notify our local branch and we will see that you are supplied.

J. W. & A. P. HOWARD COMPANY 3rd and Vine Streets, Philadelphia Telephone, Market 1721

### The CAUSE OF CARBON -how to avoid it

With the introduction of aluminum pistons and the force feed system of lubrication the need for lubricating oils of higher viscosity-heavier body—became imperative.

In most cases this has been obtained by compounding light oils with heavy oils called "cylinder stock." Admittedly this is the "easiest way out" for the manufacturer, but it is not the best way for the owner of the car.

Oils of this character when subjected to the heat of combustion (approximately 2700 degrees) break down. The lighter oils in the combination are burned off and a heavy, tarry residue remains. This sticky mass clings to cylinder walls, piston heads, valves, spark plugs, etc., and collects road dust, products of decomposition, dirt, etc. The terrific heat bakes it into a hard, flinty mass-commonly called "carbon deposit."

Knocking, pre-ignition and a thousand-and-one other troubles result—and you pay the bill.

SUNOCO Motor Oil, the highest quality automobile lubricant possible to produce, overcomes carbon toubles. It is a straight-run distilled oil-NOT compounded. It contains no paraffin or acids. The method of manufacture absolutely insures uniformity.

Read the BURNING TEST below.

SUNOCO is made in six distinct types so as to properly meet the lubricating requirements of all cars. Every Sunoco dealer has our lubrication guide, which enables him to designate the right type of SUNOCO for your car. Have him drain, clean and fill your crank case with SUNOCO—and note how much easier your engine runs.

More than a million gallons of lubricating oils per week
