

LINK UP POLITICIAN IN ARNSTEIN CASE

Bond Theft Investigators Interested in Disappearance of Former Cleveland Official

By the Associated Press
New York, May 11.—The disappearance of a former Cleveland city official who is believed to have gone to Europe was investigated here today in connection with New York's bond thefts, according to several million dollars, Saul S. Myers, counsel for surety companies in the bankruptcy proceedings of Jules "Nicky" Arnstein, alleged leader of the bond plot, said he understood the former Cleveland official left the country shortly after a visit from two men who were placed under surveillance following Arnstein's disappearance February 12.

The identity of the Cleveland man was not disclosed, but it was said that he had been in close touch with Arnstein and various gamblers and politicians in Cleveland. The investigators learned also that several Cleveland politicians visited this city and conferred with friends of Arnstein here.

The arrest of two men wanted in the case is sought by two detectives who left here for the Middle West. Investigation also is being made here of information obtained from friends of "Morty" Bernstein, alleged to have been one of the men who aided in the disposal of bonds, who died in a hospital here April 11.

Chicago, May 11.—(By A. P.)—After piecing together thousands of scraps of paper from the waste basket of Arthur Ecremont, police declared today they had obtained evidence establishing an absolute connection between Ecremont and "Nicky" Arnstein, alleged leader in \$2,500,000 bond thefts in New York.

Letters and telegrams relating to numerous stock and bond transactions were said by the police to have been found in the scraps from Ecremont's waste basket, and some of them were made public.

Letters from Ecremont to Carlos Ferrer, known also as Theodore de Mores, a Milwaukee bond salesman, were pieced together. One of the letters made public told of an appointment made by Ferrer on January 2 with an agent of a friend of Ecremont. Police declared this friend was "Nicky" Arnstein.

TO HASTEN DRAFT OF CONSTITUTION

Commission Expects to Finish Revision After Considering Proposed Changes This Week

By a Staff Correspondent
Harrisburg, May 11.—Completion of the revised draft of the proposed new state constitution this week is the aim of the commission on constitutional revision. The commission resumes sitting today, expecting to stick to the job until Friday if necessary to finish its task.

The main thing before the commission will be the consideration of approximately 600 new proposed amendments. It is expected that the amendments applying to the first five articles will be disposed of quickly. All radical proposals, such as proportional voting, the initiative and the referendum, are expected to be eliminated quickly.

As soon as it finishes consideration of the proposed amendments the commission will decide what plan to follow in making the proposed new constitution a reality. The Legislature has the final say.

The commission may decide to present the new draft to the Legislature and ask its adoption by that body and subsequent submission to the people. Or it may ask the Legislature to authorize a constitutional convention to go over the entire subject again.

Some consideration also is expected to be given to 2,000,000 potential voters among the women of the state, whose obtaining of the vote is conceded to be only a question of time.

UNDERWOOD FIGHTS FOES

Contests for Senate Seats Feature Primary in Alabama
Montgomery, Ala., May 11.—(By A. P.)—Because national as well as state and local issues were involved and candidates to be named ranged from relatively unimportant county officials to United States senators, the Democratic

state-wide primary today was expected to result in the polling of the largest vote in years. In addition to two senatorial candidates ten were to be nominated for the House of Representatives, twenty-four delegates to the San Francisco convention were to be chosen and a long list of state, court and local officers were on the ballot.

Uniformly Pure

At the Walker-Gordon Farms (one hour from Philadelphia) herds of pure bred cows produce the very finest milk under constant supervision. Twenty minutes after milking, the milk is cooled, placed in sterilized bottles, double capped, iced and ready for delivery.

You can always be certain of uniformly pure milk, fresh, sweet and wholesome—just as it comes from the cow. What this means you can quickly tell by the happy, healthy people who drink plenty of Walker-Gordon Certified Milk. Order Walker-Gordon Certified Milk by telephone. We deliver it regularly from our own wagons—also Cream and Buttermilk.

Certified by the Philadelphia Pediatric Society

"Merrily We Roll Along—"
o'er the deep blue sea"

SO goes the old college song. And the same chorus is applicable to the land.

See if it isn't. More than seven million automobiles are rolling around this country, causing a great deal of outlay and at the same time putting hustle into industry and producing much pleasure and profit.

Each car is equivalent to a private railroad, the owner's carriage laying its own track as it bowls along. You don't even have to stick to the roads—you can ride in the lots, and up the wooded lanes.

The automobile is a builder of highways, a promoter of human health, an uncoverser of scenery, a winner of wars and an aid to matrimony. It gets the doctor there on time and carries the "message to Garcia."

One person out of every 20 in these United States owns a car and the other 19 want to. Nebraska and Iowa are little States, but out there they have one motor car for every six and one-half persons. Never has there been such a demand for cars—all over the world—even in Iceland!

Successful makers of standard cars are standing on their heads to fill orders and tipping over from sheer exhaustion, with thousands of orders unfilled.

Stockholders in the right car companies are gathering a harvest of dividends never before known in the motor car industry.

And now, Mr. Man and Mrs. Woman who are reading this column, here is where you come in:

You are invited to send your name and address in order that you may receive (by mail) some vital and interesting news that will prove greatly to your financial advantage. Also a certain lively Picture Book relating to this business—all without cost or obligation on your part.

You will find out how (and why!) the manufacturers of one of the three best cars built in America have decided to let a few alert and ambitious men and women in each State participate in the profits of their expanding business.

Actual orders for cars approximating nine million dollars retail value are now on the Company's books. The entire factory production is sold up to the end of the 1921 fiscal year.

This is one of the fine cars (remember that!) selling at over \$5000 through Sales Agencies established in 22 cities.

The most prominent people in Philadelphia own this famous car and ride in it—right past your door.

And—get this!—a plan has been arranged by which you can have a share in the ownership of this successful motorcar Company easily and comfortably, and your ownership will mean full participation in all the profits of the business—now and in the future—if you act promptly enough.

Maybe you have never answered a financial advertisement before in your life—and maybe you have. But at any rate, answer THIS one. It's only a little thing to do—just a postcard—and the chances are you will be mighty glad you did it.

Strike One!

This is the first of three Announcements to be made in the Philadelphia newspapers. The second will appear in an early issue. The third Announcement will be the last. If you answer this first one TODAY you will be just that much ahead of the game.

Simply send your Name and Address—before sundown—to

Executives going to a conference in their company's Packard. Hundreds of Corporations have standardized on Packard on an economy basis—high mileage per dollar of investment and low running cost over a term of years

Does the Car Buyer Want the Facts

THE late Joseph Choate used to say that lawyers would go out of business if men were not so bent on making the same old mistakes the same old way.

No one need—or can—make the old mistakes in selecting his motor car, if he will look for transportation facts instead of "features" and "talking points."

The strong Packard opinion which he finds on every hand does not express itself in technical details or costly luxury—but in such every-day words as economy, comfort, ability and lasting value.

LET a man figure on keeping his Packard from six to ten years—and he has a material saving in investment, as against the car that must be traded in every two or three years.

Think of the stability of the Packard design! His Packard always a "new model."

His gasoline mileage will be from nine to thirteen, depending on road conditions. Oil mileage, 700 or more to the gallon. Tires, properly cared for, ten thousand to sixteen thousand miles.

The steel in his Packard is worth more than twice as much as the steel in the ordinary car.

The moving parts in the Twin-Six

engine are better balanced than in any other automobile engine. Consequently there is less vibration and less wear on bearings.

WHEN a man buys a motor car he knows pretty well what sort of transportation he expects it to deliver.

Economy does not lie in the direction of temporary makeshifts or compromises.

Packard first-class transportation will give him a definite and permanent advance in his way of traveling. It will cost him less per passenger mile during his whole motoring experience—than even second-class transportation.
