

IRISH DON'T WANT REPUBLIC LIKE U. S.

Secretary of Trades Congress
Says Personal Liberty is
Unknown Here

2000 TROOPS SENT TO CORK

Cork, May 18.—(By A. P.)—Two thousand troops from England were landed at Bantry Saturday and immediately distributed throughout West Cork, where they will be stationed at points five miles apart. Troops to the number of 120 also arrived at Skibbereen. They commandeered several buildings, including the town hall, where they made their quarters.

Thomas Johnson, acting secretary of the trades congress, appeared at a labor meeting in the City Hall here Sunday that the workers of Ireland had no intention of establishing such a republic as that in America, where the very idea of personal liberty is unknown, he said, and where men and women were sentenced to long terms of imprisonment for daring to say that America was not a land of freedom.

London, May 18.—(By A. P.)—Questioned in Commons on the number of troops being sent to Ireland, Andrew Bonar Law, the government leader, replied: "I have no information to give on the subject, but we are sending and shall send whatever troops are asked for by the Irish executive."

Scotland Yard is investigating the whereabouts of thirty-four Sinn Féin hunger strikers who on Sunday left the Maellesboro infirmary in London, where they were undergoing treatment, and also twenty-three who left another London hospital. The Sinn Féiners left because of alleged dissatisfaction with the rations.

London, May 18.—(By A. P.)—Londoners, after two nights of rioting, were again subjected to a riotous demonstration yesterday. The city was in a state of high tension, and hundreds of men remained away from their work, walking about the streets, and many individual encounters occurred between Sinn Féiners and unionists.

Last night, while unionist workers were leaving the gas works, they were attacked by a mob and maltreated. A large force of troops arrived this evening. The disturbed areas were well cordoned and crowds are not allowed to assemble. The magistrates have decided to proclaim martial law.

Rioting Sunday night between nationalists and unionist mobs was even fiercer than that of Saturday. Bricks, bottles and stones were again freely employed by the combatants and many more shop windows were broken.

Groups of men and women in the unionist quarter of Fountains street and similar groups in the Sinn Féin quarter of Bridge street followed an exchange of party cries with stone and bottle throwing. There were more than 200 rioters in the streets. In addition to the killing of an ex-soldier named Doherty, three persons were wounded. When the hostilities began the police in the disturbed area were withdrawn and for a few hours mob law was supreme.

Armed and masked men who held Carlisle Bridge as a sort of "no man's land" Saturday night, took possession again Sunday night and there was indiscriminate revolver shooting. Nationalists who previously had used the bridge to reach the water side were compelled to employ rowboats.

Dublin, May 18.—Countess Georgina Mackenzie, one of the members of parliament, whose whereabouts has long been a mystery, made a theatrical re-appearance Sunday, clad in a commandant's uniform at an open air meeting in Croker Park in memory of the members of the Irish republican parliament who were executed after or killed during the rebellion of 1916. The countess delivered an address in which she appealed for support for Irish industries.

Sir John Taylor, under-secretary in the Irish administration, who it was reported last month would resign, has returned to Dublin and resumed his duties.

Two police barracks in Limerick were destroyed yesterday. That the burning of police barracks is usually acts of war, and that, therefore, the taxpayers ought not to be held responsible, but any compensation awarded for damages should be provided for by Parliament, was the kernel of a resolution adopted today by the County Clare executive committee of the Farmers' Union, a nonpolitical organization.

WE MAY take pride in having helped in the upbuilding of this great northeastern industrial section because we share it with all our neighbors. And we want every one to feel that our more imposing premises and more extended facilities of today are but the outward signs of the greater inward personal service and individual helpfulness we shall ever strive to give.

NITRATE PROGRAM SCORPED BY G. O. P.

Majority of Committee Condemns Wartime "Waste and Extravagance"

MINORITY REPORT DEFENDS

By the Associated Press
Washington, May 18.—Two reports, one by Republicans condemning the government's entire wartime nitrate program and charging reckless waste and extravagance and the other by Democrats defending it and charging partisan bias by the majority, were presented today to the House by a special committee which took up the investigation nearly a year ago.

Along with its forty-one general recommendations of the government policy, the Republican majority, comprising Chairman Graham, Illinois, and Representative Joffis, Nebraska, submitted recommendations for future disposal of the Muscle Shoals properties, which Representative Garrett, of Tennessee, the Democratic member, declared was beyond its province. Mr. Garrett indicated he would make a point of order against the report on that ground. Members said this would open the way for the biggest political fight in the House since the war investigation committee was appointed.

Republicans laid the blame for the nitrate program, entailing an expenditure of about \$110,000,000 at the direction of President Wilson, with Herbert M. Harbo, as the moving spirit of the wartime project, although Representative Garrett, speaking for the minority, declared that he would make a point of order against the report on that ground. Members said this would open the way for the biggest political fight in the House since the war investigation committee was appointed.

Harbo, as the moving spirit of the wartime project, although Representative Garrett, speaking for the minority, declared that he would make a point of order against the report on that ground. Members said this would open the way for the biggest political fight in the House since the war investigation committee was appointed.

Profit in Bricks.

"When I bought that old building, twenty years ago," said a Philadelphia owner who has just sold at a high price. "I thought I might make money on the ground, but I never dreamed of making it on the building. That I thought would be torn down before this. But solid brick buildings are too valuable to tear down now, even if they are old. It was easy to sell this one at a good profit."

This genuine case shows the wisdom of building with solid brick. This building would be sixty years old now—but it's good for sixty more, and the owner has made money by using it, and now he makes more by selling it—for it's already built, you see, and it's brick.

Do you want beauty, or permanence, or safety, or low cost, or profit in a building?

Build of common brick, and get them all.

"BUILD WITH BRICK—IT LASTS FOREVER."

investigating committee's report. He said the corporation made no profits whatever from the job, as 85 per cent of its fee was taken by taxes and the remaining 15 per cent went to expenses which the government could not pay. He also attacked the methods of the majority of the investigating committee.

"Persons criticized were forbidden to cross-examine," said Mr. Washburn. "Reports by detectives, unnamed, unsworn, and in one instance unnamed, were admitted as evidence. The critical witnesses unsworn by Chairman Graham included disgruntled carpenters, mess hall stewards, men without experience or qualifications, an army officer cashiered for drunkenness, a de-

Law Students Strike Again
Albany, N. Y., May 18.—(By A. P.)—The entire student body of the Albany Law School—280 in all—went out on "strike" today, for the second time within a week, in protest against the attendance of Jacob M. Goldenkoff, expelled for alleged radical utterances. Goldenkoff returned to the school under the protection of a court injunction.

SUES FOR BEW'S INSURANCE
Widow Claims Airplane Victim's Policy Not Void Through Clause
Atlantic City, May 18.—Recourse to the amount of \$3000, under an insurance policy, is asked by Mrs. Marie J. Fitzsimmons Bew for the death of her husband, James Bew, Jr., an insurance broker, in a suit against the "Travelers' Insurance Co., the first ever brought in New Jersey, it is believed, for an airplane fatality.

Bew met his death a year ago, when a flying boat in which he was riding with Beryl Kendrick, his partner in an aerial passenger-carrying enterprise, dived from a height of 300 feet into the inlet, killing both men instantly.

the inlet, killing both men instantly. The insurance company has refused to pay, it is stated, because of a policy provision that there should be no liability "for injuries, fatal or nonfatal, for participating in or in consequence of participation in aeronautics."

Counsel for Mrs. Bew holds that the flying boat was in regular passenger service and therefore a common carrier. The suit is scheduled for trial this week in the Circuit Court.

State Conventions in Nebraska
Lincoln, Neb., May 18.—(By A. P.)—The Republican state convention met here today to select a state central committee, adopt a party platform and name presidential delegates. M. P. McDonald, of Kearney, was chosen as temporary chairman to deliver the keynote address. Nebraska prohibitionists also met in party convention here today.

How does she pull on the long grade?

WHEN you haven't had a chance for a fast take-off at the bottom of the hill—
How does your car hit the top?
If you're down to a few miles an hour in second gear, better give a thought to engine performance. You might have been doing thirty-five over the brow. You can't climb hills in comfort on sluggish gasoline. It vaporizes slowly. Have the famous 15 to 1 mixture turned up on your carburetor. That's where Tydol, the Economy Gasoline, is especially made to work, giving your engine full power. On this mixture excess carbon deposits and engine trouble are avoided with Tydol.

TYDOL
ECONOMY GASOLINE
LOOK FOR THIS SIGN

What really explodes in your engine
AIR 8 to 1
AIR 15 to 1
With Sluggish Gas 8 parts of air 1 part gasoline
With TYDOL Gas 15 parts of air 1 part gasoline
How to make the 15 to 1 adjustment
Fill gasoline tank with Tydol. Run engine till warm. Lift hood. Turn gas adjustment on carburetor, decreasing gradually flow of gas. When engine slows, turn gas adjustment back, slightly increasing flow to get maximum engine speed. This is 15 to 1 adjustment. Tydol will operate on rich, wasteful mixtures required by inferior gas. But you can use 15 to 1—more air, less fuel.

WANTED—FEMALE.
BOOKKEEPER and general office work. In the home, or office. Hours: 9:30 to 5:00. Phone: 2-1000.

WANTED—MALE.
AUDITOR—Experience in super-charge and time study work. Ability to analyze manufacturing work and manufacturing operations. Full preservation, capable of making 100% collection. Must have good references. Salary \$25.00 per week to quality.

WANTED—MALE.
GENERAL OFFICE MANAGER. Must be familiar with figures, facts of their business with the Dalton. \$5 to \$80 per cent. (later than as possible with ordinary machines).

How 65,000 Business Men are Meeting the Help Shortage

Figures—the foundation of business—cannot be slighted, even in times of labor famine like the present. 65,000 business men—retailers, wholesalers, manufacturers—are finding the Dalton invaluable in keeping up their figure-work in this emergency.

The U. S. Government is using more than 6,000 Daltons; The Pennsylvania Railroad has 250; The Prudential Life Insurance Company 100 and many other corporations equally large numbers.

The Dalton has 13 keys only—one for each figure. Any one can use the Dalton immediately—no special instruction is required. Column selection is unnecessary. Touch method operation, practicable only on the Dalton, saves thousands of waste motions daily and doubles the operator's speed.

It is two machines in one—it adds and calculates, multiplies as easily as it adds. It makes out statements, takes trial balances, extends invoices, figures wages, and fractions, computes interest, cross-foots, tabulates and makes out statements.

Phone for Demonstration
Join the ranks of these 65,000 time-savers. Satisfy yourself of the economies of the Dalton—telephone us today for a demonstration in your own place of business. It will not obligate you at all.

Overland
What This Sedan Means in Summer
Convenient Protection from Unpleasant Weather, and Cooler, More Comfortable Riding When the Sun is Warm

COOL, clean, refreshing motoring demands protection from sun, rain, chill and dust. Overland Sedan affords that independence of weather on which many summer functions must depend for complete success. It gives the protection summer clothes especially require. Best of all it is a light, economical, handy car for touring. Its many economy advantages are increased by the greater mileage of summer. Beautifully finished and completely equipped.
