

WOULD OPEN GATE TO IMMIGRANTS

Senator Edge Tells Manufacturers of Need to Relieve U. S. Labor Shortage

SCORES RADICAL INFLUENCE

By the Associated Press

New York, May 18.—Temporary modification of the immigration laws to permit an influx of desirable immigrants to meet America's labor shortage was urged here today by Senator Walter E. Edge in an address before the National Manufacturers' Association. He also advocated a process of Americanization to prevent new immigrants from falling under the spell of "world-wide anarchists and Bolsheviks."

Immigrants should be "saturated with American loyalty and patriotism," Senator Edge added, and should be prevented from being "led through the mine of radicalism into the morass of anarchy."

Quoting Commissioner of Immigration Caminetti as stating that the radicals have "a wonderful organization for carrying each immigrant, almost at the moment of landing, and bringing him under their influences," the Senator said that less than six weeks is needed to prepare "his mind for welcome reception of communist doctrines."

Quickly Fed on Anarchy
"Anarchistic newspapers and other literature are fed him in generous doses," declared Senator Edge. "Why, some of the stuff that is allowed to circulate through the United States mail is outrageous."

The Senator said he did not mean to "open the doors to an indiscriminate horde of newcomers, adding that undesirable must not be admitted."

"Moreover, against such undesirable," he added, "who may filter through, I would apply every law for deportation without the tenderness apparently shown for radicals and Bolsheviks by officials of the present administration."

Labor in Great Demand
America needs common labor in all of its industrial fields, Senator Edge declared, adding that "industries of all kinds are handicapped and in some instances almost crippled" by the shortage of workers.

Against Class Distinctions
"Class favoritism and class distinction and class privileges in legislation must be repealed and never again be attempted. As a start, I have introduced in the Senate a bill to repeal the exemption of labor and farmers' organiza-

DEATH CHAIR FOR CRIPPLE

Problem of Executing Wooden-Legged Man Solved

New York, May 18.—Sing Sing prison attendants announce they have solved the problem how to electrocute John Egan, who has a wooden leg. The man, who is convicted of a murder in the Bronx, is to be executed June 14. In the twenty-nine years the electric chair has been used an electrode has been applied to the right leg. As wood is a poor conductor of electricity, the prison attendants have decided it would be safer matters if the electrode were fastened to the wood of the leg. The wiring of the chair will be changed and the electrode shifted to the left side.

MISSING GIRL FOUND

Daughter of Rich Cuban Manufacturer Reported at Los Angeles

New York, May 18.—(By A. P.)—Henrietta Bulte, fifteen-year-old daughter of a wealthy Cuban cigar manufacturer, who disappeared from her home here April 11, has been found in Los Angeles, after a nation-wide search, according to information received today at police headquarters. The girl's father will leave at once for the Pacific coast to bring her home.

Socialists Call on Baker and Present Memorial of Party

WOMAN HEADS DELEGATION

By the Associated Press

Washington, May 18.—A committee appointed by the Socialist party called on Secretary Baker today to present a memorial asking for the release of conscientious objectors still held in prison. The delegation was headed by a woman, Elvina S. Beals, of Berkeley, Calif., and the other members present were Herman D. Kent, of Wisconsin; Carl Parsons, of Minnesota; Joseph W. Schwartz, of Ohio, and Abraham Tulin, of New York.

Hudson Is Best Known For Its Super-Six Motor

Official Proofs Established Its Supremacy; Thus Hudson Became the Largest Selling Fine Car

Few of the 90,000 Super-Six owners have ever tried the limit of Hudson speed or power. They realize they have a vast reservoir of ability that is never called on.

Yet no one mistakes it for mere idle surplus simply because it is beyond his ordinary requirements.

For that latent capacity is Hudson's great value. It is the life of a car. Because of it, thousands are now getting the fullest satisfaction and service from Super-Sixes nearly five years old. They know the durability it gives. They know what it means in smooth operation. Their cars have required neither costly replacements nor constant attention to minor disorders.

Moreover, it is good to know that you have at instant call greater speed, acceleration and hill-climbing ability than any other stock car has ever shown.

80% More Efficient—Within 10% of Perfect

Many have called the Super-Six "the perfect motor." That, of course, is not accurate. Perfection would mean utter freedom from friction and vibration. No machine can ever be that. But the Super-Six comes within 10% of it. Could another type approach that close, Hudson's records might be matched. But for nearly five years they have stood. None has equaled them. The possibility of their being rivaled seemed never more remote than now. Certainly the type to do it has not yet appeared.

And mark this important fact. Hudson's supremacy means no added complications, weight or size. The patented Super-Six principle applied to a standard type of motor added 72% to power. Motor efficiency is increased 80%. Endurance thus has been increased to limits yet unknown.

Note These Tests Made to Prove Its Endurance

The Super-Six today is naturally a finer car than those earlier models which made its records. But isn't it encouraging to note there are no obsolete Super-Sixes? They are still in service, with the same distinction of performance as when they contested against cars of an earlier period. The owner of a Hudson with four years' service to its credit still knows his ability to dominate any situation.

For Four Years Almost a Twice-Better Car

Think that a Super-Six stock chassis set the speed record at the rate of 102.53 miles per hour. A stock Super-Six holds the acceleration record. And Hudson made the fastest time for the famous Pike's Peak hill climb. The Super-Six principle in speedway-racing won more points than any racing team ever took in a single year. And think of Hudson's double trans-continental run of 7000 miles in 10 days 21 hours. No other car ever equaled its time in either direction.

Those tests speak for Hudson endurance—the real reason for its appeal to you today. There can be no question regarding its beauty, its completeness, its fitness—advantages patent to any observer.

You will best assure delivery when you want it by speaking for your Hudson now.
