

### NEW YORK SHIPPERS PRAISE PORT HERE

Speed in Loading is Boosted by Firm—Get Large Consignments Through Phila.

### ADVERTISE MANY FACILITIES

Praise of the port of Philadelphia and the expedient methods used here in handling export shipments has been given by several large New York shippers.

In order that New York concerns, whose merchandise is held up by freight conditions there, may realize the benefits of shipping via Philadelphia many advertisements are being run in New York newspapers by freight contracting organizations of New York.

Davis E. Gilchrist, Inc., Bridge and Whitehall streets, New York, who also has offices in the Drew Building in this city, said:

"Recently we handled 163 cars of automobiles for a corporation that, until this shipment, had never routed anything through Philadelphia," said Robert A. Gilchrist, yesterday.

"The freight jam in New York has acquainted thousands of western shippers with the fact that there is a port here which can get things through."

"We are receiving freight for export shipment through this city from all sections of the West and South. At the rate business is growing we need more piers. Those of the government at Oregon avenue are the finest on the Atlantic coast and should be thrown open to the public. Virtually all the freight shipped through New York is handled by lighters, which makes for delay. Even where rates are equal otherwise, the time lost increases the total cost."

"It has been difficult to get New York shippers to realize this heretofore. But when they diverted shipments to this port, had the staff aboard an hour after the freight trains reached the piers and had their shipping records in their offices five hours later they began to see the light."

"In contrast to the direct loading method in vogue here where freight is taken from the cars on the piers and trucked or derricked into the ship-holds, in New York the shippers must take the railroads' twelve days' notice before freight in cars will be delivered to the ship."

### LEGION INFORMED OF VOCATION WORK

4600 Men Placed in Training, Officer of Federal Board Reports

### RESULTS GAINED QUICKLY

Forty-six hundred men have been placed in training by the district vocational officer, federal board for vocational education, according to a statement of Director Robert J. Fuller before the conference of representatives of the American Legion, and former service men's and welfare organizations.

Director Fuller said 3000 of these men are training and between 400 and 500 have discontinued training for various reasons. An average of 100 men

a week have been placed in training since last November 1.

Director Fuller emphasized that his office is able to place men in training very shortly after discharge from hospitals.

The act of June 27, 1918, as amended July 11, 1919, makes possible the re-training of men who have a disability incurred, increased or aggravated in service. Training is offered under two plans, with and without training pay.

The local board is endeavoring to expedite action on all cases.

To follow up men who were placed in training that they may actually become rehabilitated.

To assist men to positions after training has been completed.

There will be an adjourned meeting of the conference of the American Legion and former service men's and welfare organizations in the Chamber of Commerce, Friday afternoon, June 4, at 4 o'clock, when it is hoped a permanent organization may be effected to act as a clearing house for groups endeavoring to assist discharged men.

Director Tustin, of the Department of Public Welfare, chairman of the conference, will preside.

George W. Nofer, of the Elm Tree Post, No. 88, reports a membership of 240, half of which is paid on the 1920 basis.
