**We build better factories for bigger production**  
By better factories we mean more efficient factories. The kind that yield maximum production with maximum economy.  
How can we guarantee such results? Because we plan and design every detail of routing material, placing machinery, power, lighting and sprinkling systems before construction is begun.  
Steele's staff of experts first thoroughly studies your manufacturing processes from every angle. Every improvement is sought to increase your production and reduce cost.  
We have proven time and again our ability to decrease cost and increase production capacity under The Steele Idea of Industrial Construction.  
During our 55 years of experience in producing industrial plants of the utmost efficiency we have built up specialized departments second to none in America. This complete, expert industrial service is part of our total service to clients.  
The sum and substance of The Steele Idea is that we build your plant under one intelligent plan and direction, one responsibility and one contract, from start to finish. All uncertainty and risk of error are eliminated by centering control in Steele.  
Manufacturers who are thinking of building, rebuilding or adding to their factories are invited to put their problems up to Steele. Phone or write for an interview.
