

LEGION DEMANDS BERGDOLL INQUIRY

Committee Condemns Slacker and Asks Congressman Kahn to Press for Probe

APPROVE SUNDAY CONCERTS

Condemnation of the slacker, Grover C. Bergdoll, was voted in a resolution by the Philadelphia county committee of the American Legion, in the City Club last night. The resolution called upon Representative Julius Kahn to press for an immediate congressional investigation of the Bergdoll escape.

The Philadelphia county committee of the American Legion, representing the seventy-eight posts in Philadelphia, and believing that it voices the sentiments of the more than 75,000 former service men and women of this city, at its regular monthly meeting, held last night, unanimously approved the resolution introduced by you for the investigation of the Bergdoll case. The committee urges that the resolution be adopted before Congress adjourns so that the investigation may take place during the recess and responsibility for this national scandal be definitely fixed and those who aided Bergdoll in his original evasion of military service as well as those who helped in his subsequent escape from prison, regardless of their position in the military service or in civil life, be indicted and brought to trial for their crimes. The committee hopes that no witness known to have had any personal or professional relationship with Bergdoll will be called before the investigating committee without first agreeing to waive immunity from prosecution.

Indorsement of Sunday concerts to be conducted by the Pennsylvania public music committee was voted by the

Legion. These concerts will be arranged in the autumn. The suggestion was brought to the attention of the county committee by Miss Louise Elder. The Legion will co-operate with the Pennsylvania public music committee through the Legion's Americanization committee, of which George S. Stewart, Jr., is the chairman.

Miss Patricia F. Crosby, chairman, reported that the entertainment committee has provided a jazz band for Captain Fox, of Motor Command No. 58, in which there are thirty wounded soldiers. Captain Fox had been unable to obtain any free talent from any source in Philadelphia until the Legion gave assistance.

The following delegation will represent Tioga Post, No. 319, at the state convention in Allentown: Dr. William E. Raken, George Guest, Jr., Glendon T. Tongue, Jonathan S. Christie, Fred P. Crawford and Harry B. Davis. Commander Raken will head the delegation. Oscar H. Gruber Post, No. 152, which has recently carried through a successful membership campaign, will be represented by James Purcell as delegate and Henry De Wolf as alternate.

GREATEST WARSHIP GOES INTO SERVICE

Superdreadnought Tennessee Has "Fighting Brain" of Three Decks

By the Associated Press
New York, June 3.—The superdreadnought Tennessee, the largest and most formidable battleship afloat, goes into commission today at the Brooklyn Navy

Yard. Constructed here at a cost of \$20,000,000, she represents the last word in battleship architecture. She is 625 feet long, has a beam of ninety-eight feet and a displacement of 32,500 tons.

She is the next thing to a pleasure yacht in the comfort of her appointments for officers and men; she is the first battleship to recruit her entire personnel from the state from which it takes its name and she represents advantages taken from lessons learned in the battle of Jutland and other important naval battles of the world war. The last special feature, which distinguishes the Tennessee from all other units of the United States navy, is the highly organized "fighting brain," enclosed in a steel fort near the top of the foremast. Here are concentrated devices for observing enemy ships, detecting the position of enemy craft, enabling the crew to quickly ascertain the position of enemy craft.

Three-Deck "Fighting Brain" Special devices are installed in this turret which enable the crew to quickly train the fourteen-inch guns on the enemy before the crew of any other battleship could even sight the Tennessee. This new device consists of three decks and their fighting complement is twenty-five men.

By special signaling devices, connected throughout the ship, reports from this fighting top can be flashed instantly to all parts of the ship, thus insuring instant correction of range and rapid fire. This "fighting brain" is filled with mechanical devices for range finding and other delicate instruments never before used on a battleship. Another important feature in the construction of the Tennessee is her electrical control of speed, enabling her to quickly change from her capacity speed of twenty-one knots to an almost imperceptible motion. This is considered an important point from the standpoint of maneuvering.

Built for Crew's Comfort The Tennessee is believed to have been built with more care for the comfort of her crew than any other battleship in the world. Her size makes possible spacious lockers, baths and recreation quarters. She has a handsomely furnished club room and library for enlisted men. She has a printing shop with a linotype machine and presses on which a daily newspaper will be printed. The Tennessee is the first battleship to be equipped with a motion picture camera. She will not actually be put into service until August 1, when she will sail on a practice cruise to Guantanamo, Cuba. Her present crew of Tennesseans numbers 631. A large delegation of Tennessee folk was in New York today to attend the ceremonies. Governor A. H. Roberts, of Tennessee, who was expected to be present, telegraphed that he would be unable to do so. Captain R. H. Leigh is the commanding officer.

When She's Fitted Out Here you can be sure she will stay fit the entire season. Marine gear, paints, varnishes, ropes, everything you need for that boat—and of the best. F. Vanderherchen's Sons 7 N. Water Street, Phila. "At the Head of the Boat"
