Doctor Wolle's de votion to the music of Sebastian Bad was well known to his friends long be fore the first Bach festival was emplanned. In fact, the first Bach feel val was not a festival at all, and it doubtful if at that time Doctor West even thought of, much less planned, annual affair.

He was anxious to give the first per-formance in the United States of the B minor mass, and with the determina-tion and devotion to his idea which has characterized his work with the Bad Choir ever since, he carried it to a sa-cessful conclusion. Last week the writer, who attended that first perform-ance, mentally contrasted the scene di 1900, when it was first given, with the chorus, orchestra and, above ail, the audience of this year's performance. And yet, considering the difficulties under which Doctor Wolle labore twenty years ago, the small and com-paratively inndequate chorus, the or-chestra, made up largely of amatee-players, and other things incidental to the initial performance of the gigantie commention. players, and other things incidental is the initial performance of the gigantic composition, the performance was amazingly good, but no one in the coun-try but J. Every year the same faces are seen at Bethlehem and the "high spots" of the B minor mass—and there are lots of them—always make the same profound impression of dignity, graa-deur and awe. The mass is one of the greatest of choral works and is, as probably always will be, the chief event of the Bach facture! of the Bach festival.

But that first day should not be overlooked in its importance to the musi-cians. Then it is that works of the greatest musical genius who ever lived,

strength, and its supreme chief, the greatest musical genus who ever lives, which cannot be heard elsewhere, are sung. The mass has been given is protection, if not to Rome? A well-paved street is a large factor in bringing and retaining business, and Passyunk avenue is badly in need of the improvement now authorized by the Mayor. At least from Fourth street to Broad, there are few streets outside the central section in Philadelphia more entirely devoted to business purposes than this southern diagonal street. The prosperity of a neighborhood depends to large extent upon the business done there, and this business can be retained, let alone augmented, only by making access to its stores as easy and comfortable as possible for vehicular traffic.

### PUBLIC GETS SHORT END

DRESIDENT WILSON'S commission to settle the wage dispute between the anthracite miners and the operators is just what such a commission should not be

It contains three members, one representative of the public, one a representative of the miners and one a representative of the operators. This means that it stands two for the coal industry and one for the public,

The operators can pass on to the consumers any increase in wages. Their interest in keeping the cost of coal down flies in their desire for a price which will not provoke popular indignation. The miners are interested only in an increase in their wages.

The wage commission can agre an increase in wages through a combination between the representatives of the miners and the operators, and the representative of the public will be powerless to prevent it.

What we need is a tribunal committed to the protection of the public interests, like President Roosevelt's board in 1902, where the majority had now until the end of next week and connection with the coal industry at all.
