### BANKING SERVICE THE WORLD ROUND

TROM the peaks and plains of Argentina to the mosques and minarets of Eastern lands, from Spain to the Coast of Africa, in out-of-the-way corners of the world as well as in mighty centers of finance and trade, this bank has served constructively in the past and is prepared today to continue its aid in extending the boundaries of American commerce.

# TYPHOID WARNING

Annual Caution Against Use of Infected Water Given to **Vacationists** 

#### RECOMMENDS VACCINATION

Philadelphians leaving the city for vacations in the country or at the seashore are urged to take strict precautions to protect themselves against typhoid fever.

The prevalence of this disease among persons who expose themselves to unusual risks in the summer has resulted in the particular designation of "vaca-tion typhoid" as among the city's pre-ventable ills. It has always developed in this city after the vacationists have

returned.

The disease develops very slowly and for this reason typhoid becomes prevalent in this city in the late summer and early autumn of every year. About one-third of all the cases reported through-out the year occur during the months of August and September, according to the health bulletin on the subject which has been issued by Dr. C. Lincoln Fur-bush, director of the Department of Public Health

Public Health. "Twenty-five per cent of the cases during these months are traced to out-of-town sources," said the director. "It is, therefore, timely to warn va-cationists about the danger of contract-

cationists about the danger of contracting typhoid fever.

"The water and milk supply are the chief sources of infection in summer resorts, while the less frequent sources are foods contaminated by flies and by handling, raw vegetables washed in infected water or taken from fields fertilized with night soil, seafood taken from sewage-polluted waters and bathing in infected streams.

ing in infected streams.

"One of the ways of protecting one" self against this disease is by vacci-nation. This method was used with great success in the army and navy dur-ing the world war. Every soldier and sailor was required to submit to this protective inoculation. The result was convincing proof of the value of typhoid vaccination

"Persons who intend to travel during the summer months or at any other time of the year will do well'by applying to their family physician for vaccina-

"This procedure, however, is not substitute for the general recognized sanitary measures, such as filtration of water, pasteurization of milk, climina-tion of breeding places of flies, protec-tion of foodstuffs from dust and han-dling, but is only an adjunct to them.

'Last year Philadelphia had the low-est typhoid death rate in its history. There is every reason to believe that this record could be made the lowest in the country if the imported cases of infection could be eliminated."

\$124 a Week for Pressing Clothes Boston, June 14 .- He came to this country only a few years ago and has not yet mastered the English language. He found work with many of his com-patriots in what had been a sweatshor until they were legislated out of existence. He is a bushelman, which means that he presses newly made clothing. He showed his week's pay envelope Martin & Co. until the istence. and the money. In one week, without overtime and not too hard work, he re-
