and Mortgages

"ONE reason why I always build of brick," said a shrewd suburban operator, "is that brick will support a heavier mortgage. In other words, I can borrow more money on brick houses, at a lower rate of interest." That is plain common

sense, isn't it? Brick doesn't decay, doesn't have to be preserved by painting, doesn't blow down or burn up. In a word, it costs less and is worth more. Every lender knows this, Why shouldn't it be easier to finance a brick operation?

What do you want in a building?-is it beauty, or permanence, or profit, or high value, or low cost? Build of common brick, and get them ALL.
