

UNA SCONFITTA AI RIBELLI ALBANESI

Arditi ed Alpini Italiani in Riconoscenza li Costringono a Ritirarsi

Published and Distributed Under PERMIT NO. 341. Authorized by the act of October 3, 1917, on file at the Postoffice of Philadelphia, Pa. A. S. BURLINSON, Postmaster General.

Roma, 22 giugno.—Gravi combattimenti tra insorti albanesi ed Arditi ed Alpini Italiani sono avvenuti vicino Dracovizza, quando le truppe italiane tentarono di fare una riconoscenza con autocarri. Cio' secondo un dispaccio giunto da Valtana al "Giornale d'Italia."

Durante l'avanzata dei reparti italiani di riconoscenza questi s'incontrarono con un considerevole contingente di insorti e ne seguì un violento combattimento. Impossibilitati più a lungo a sostenere il fuoco degli italiani, gli insorti albanesi furono costretti a ritirarsi nelle loro linee.

Si crede che nelle linee al di là di Valtana siano accampati oltre 4000 insorti, mentre freschi contingenti continuano ad arrivare dal nord.

Gli aviatori italiani, che son volati sopra le linee degli insorti, hanno rapportato che gli albanesi si fanno esercitando ed appare siano addestrati da ufficiali esperti.

Roma, 21 giugno.—Da dispacci giunti da Valtana si rileva che i preti musulmani hanno cominciato a predicare la guerra santa contro gli italiani tra gli albanesi ed i turchi. La campagna viene fatta nelle chiese.

Quaranta gendarmi albanesi, che si sono arresi agli italiani, hanno dichiarato che un forte contingente di in-

sorti albanesi si è concentrato ad Argiro-Castro, sotto il comando del maggiore albanese Ismail Kebi, pronto a marciare verso Valtana, per operare un altro attacco. Sempre secondo i predetti, seicento gendarmi albanesi avrebbero occupato Tirana.

Napoli, 21 giugno.—Gravi danni sono stati causati da un nubifragio scatenatosi domenica, con il contro nelle vicinanze di questa città. Torrenziali pioggia e di pietre, accompagnati da fulmini e scariche elettriche, caddero di buon'ora, al mattino, distruggendo proprietà specialmente in Posillipo, ove l'acqua nelle strade raggiunse l'altezza di un palmo trascinandosi terra e pietre.

MARY AND 'DOUG' IN LONDON

Screen Stars Receive Ovation as They Debar From Steamship

London, June 22.—Douglas Fairbanks and his bride, Mary Pickford, received an ovation when they landed at Southampton yesterday on their belated honeymoon. Scarcely had the steamer docked when a throng on the quay set up a shout of "Mary! Mary!" Doug swept his bride off her feet, tossed her like a feather to his shoulder and, with her perched there, fought his way laughingly down the gangplank and toward the special train waiting to bear them to London.

It was no use. The crowd simply wouldn't have it. The people had come to see Doug and his "million dollar smile" and his pretty wife, and they did not intend to be balked of their purpose.

The honeymooners, vanquished by the movie fans, finally submitted gracefully and turned the situation into a lark. Mrs. Fairbanks glowed with all the excitement of a schoolgirl.

"The dream of my life has come true," cried Mary, clapping her hands. "I'm going to see the Strand and Piccadilly Circus and all the rest of it."

"We had originally planned to stay only a few days in England and then go to Denmark and Italy, and return here later," explained Doug. "But it would take up ten years to do all the things we should like to do while here."

Governor Coolidge Visits Maine
Boston, June 22.—(By A. P.)—Governor Coolidge went to Maine today. At Augusta he is to spend the night as the guest of Governor Mellen. Tomorrow at Lewiston he will attend the commencement exercises at Bates College.

Amberg

Much Office Legislation
Is Enacted To Regulate Files

The Amberg Plan Works With the Office Manager--Not Against Him

THE office manager shoulders responsibility for the performance of ordinary files the instant their complications, unnecessary coding and dependence on memory start to cause misfiling, delay and loss of documents.

The Amberg plan is not coercive, but cooperative. It stays simple. Basic filing principles are fitted to your established office methods. If necessary, anyone familiar with your routine can find filed records by the Amberg Plan. And—operating the Amberg Plan after hours doesn't demoralize files for the file clerk.

The Law of Correspondence Basis of The Amberg Plan

Commercial names appear in correspondence according to a law. After analyzing millions of names, Amberg discovered this law and named it the Law of Correspondence. It is based on the Amberg masterlist of 205,920 names proved by observation to occur with 99½% constancy in business. When applied to your correspondence together with provision for the special volume of filing created by your purchasing, agencies, branches or other special relationships, this law gives correct distribution of documents and dependable filing.

Why Over 75,000 Firms Have Adopted The Amberg Plan

The Amberg Plan is not a system but a method. How it is applied depends wholly on how you are organized, who you sell to, who sells to you. It can never fail to result in individualized files. Leading concerns in all lines of business in every section of the country are having their files individualized by the Amberg Plan. They are tired of the expense, delay and aggravations of files which fail to find. And which—waste the time of executives and others with unnecessary coding and other complications.

How You Can Test the Value of The Amberg Plan to You

Make Amberg prove to you that the Amberg Plan can solve your particular filing problems. It will be worth your while to know in just what respect the Amberg Plan will help you. You will gain some valuable ideas about filing no matter what you decide.

Though Amberg manufactures the highest quality of Wood and Steel Filing Cabinets and every filing accessory, Amberg only sells filing materials as a means of solving filing problems. As many Amberg Plans are installed in other makes of cabinets as in Amberg cabinets.

The Dalton—a Figuring Machine 25 to 80 per cent Faster

The figure work of business can be handled 25 to 80 per cent more speedily on the 10-key Dalton than on any other machine.

This is because the Dalton represents a development in figuring machines—one in which adding and calculating are combined.

The United States Government has purchased more than 6,000 Dalton Adding and Calculating Machines; The Baltimore & Ohio Railroad has bought more than 250; The Prudential Life Insurance Company has installed 100—the list of individual and corporation users of the Dalton is almost endless.

Precedent, sentiment, and ingrained habit were ignored by these buyers—

they were moved to their selection of the Dalton for reasons of efficiency alone.

You will be equally impressed by the Dalton. It has 10 keys only—one for each figure. Anyone can use the Dalton. Operation by touch method is possible—"eyes on the work—fingers on the keys." Accuracy is increased 80 per cent over ordinary machine methods. Speed is increased 25 to 80 per cent.

Phone for Demonstration

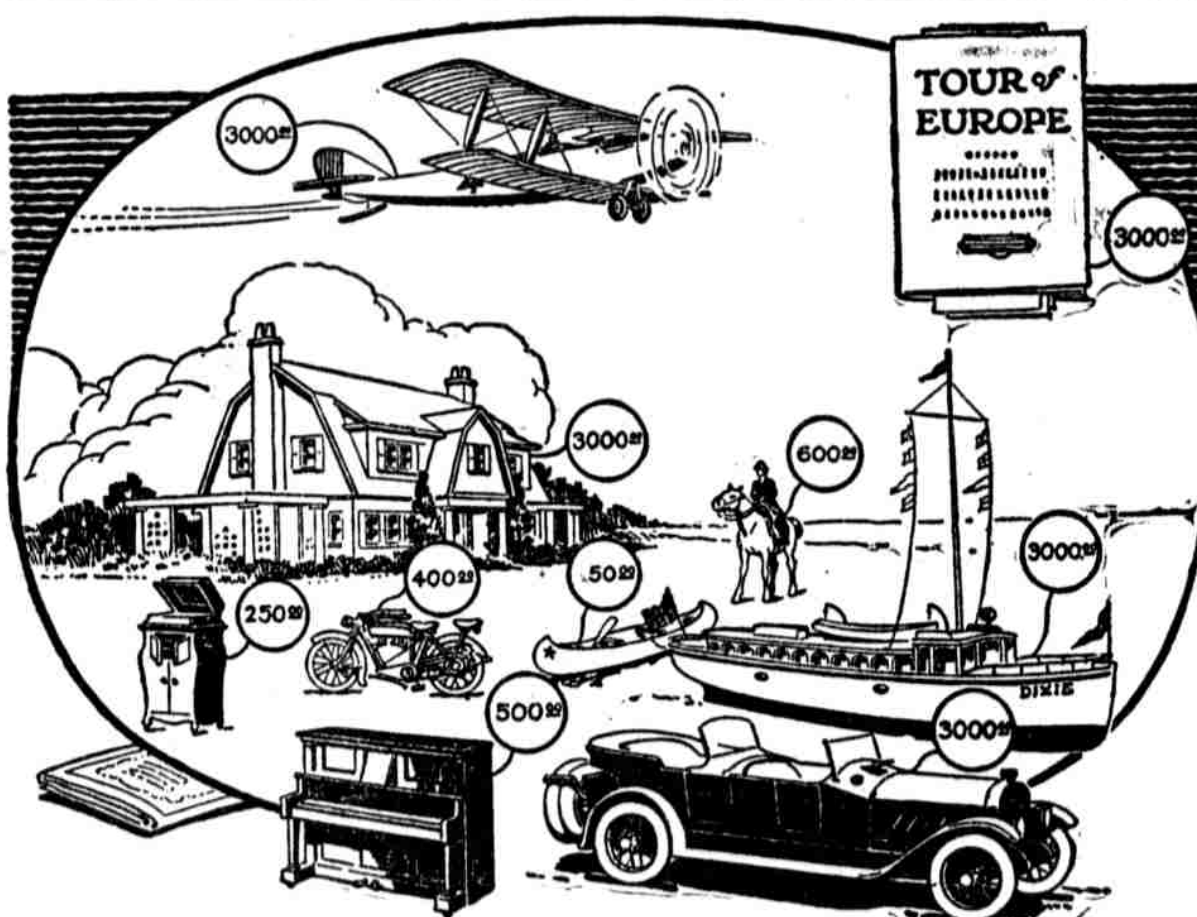

Ask a Dalton man to show you how the Dalton can effect economies for you. Telephone—that's all. We will bring a Dalton to your store or office for a demonstration without obligation.
