If Your Feet Swell In Hot Weather—
Try Cantiever Shoes.

Feet swell from poor circulation, from strained cords and muscles, from ill-fitting shoes. Cantiever Shoes are a delightful change from ordinary footwear because—

- (1) The flexible shank affords such perfect freedom to the foot that the muscles are exercised in walking, the blood circulates naturally through the tissues, and the foot grows strong.
- (2) The natural inner sole line allows the toes to point straight ahead, and the slightly tilted heel tends to distribute the weight evenly over the foot arch. These features encourage a natural posture, without strain on any cords or muscles.

In addition to their restful fit, Cantiever Shoes have a most attractive appearance. They are as good-looking as they are comfortable.

Of fine leathers and white Egyptian canvas. Widths from AAAA to E. Write for booklet.
