## Annual Fur Sale

An Instantaneous Success! Pre-Season Savings of 20 to 45 Per Cent!

If past years form a standard, the 1920 Annual Fur Sale has already proven a most stimulating success. Large attendances were the record on Monday, and enormous purchases of Furs resulted.

The Savings are as large as they were unexpected, for the Spring skin buying season showed such vast increases at wholesale that correspondingly large increases at retail were looked for. But we proceeded with our customary business caution, and later were enabled to make our cash investments of Skins at prices that showed great declines from those that obtained earlier.

The advantages are here for you today! Manufacturing our own Furs, from these very Skins that we bought at practically our own prices, we have reduced the costs to such an extent that the following Remarkable Values are possible:
