

Reason for Opposition Is Given Republican Women by John Grier in Address

Jealousy is at the bottom of politicians' opposition to woman suffrage. John Grier, a real estate assessor and one of the officers of the Republican Alliance, told members of the Republican women's committee this afternoon at their headquarters, 506 South Broad street.

John Voorhees, secretary of the Alliance, accompanied Mr. Grier to the meeting and also addressed the women. The meeting at the women's head-

marters was held at 1 o'clock. An hour later the executive committee of the women's committee was scheduled to go into conference with the city campaign committee of the Republican city mittee at their headquarters Eleventh and Chestnut streets.

This conference was arranged by Thomas F. Watson, chairman of the rity committee, and Councilman Charles Hall. Mrs. Waltler S. Thomson, chairman of the Republican women, has been in conference also with Sena-tor Penrose and officers of the Republican Alliance. It is expected that the Republican women, without reference to the factional differences of the men to the inclosed and environment of the role of their who are engerly seeking the role of their mentors, will work for the Republican candidates in the November election.

Many Attend Meeting The meeting at the women's head-quarters this afternoon was largely at-tended. Mr. Grier said :

"Naturally the voting of women has caused the men politicians to specu-late, and opinions expressed vary as to hate, and opinions expressed vary as to how the problem of voting will work out. I am surely opposed to some of the ideas offered. The fear of conges-tion at the polling places can easily be obviated if a little bit of common sense and good judgment is used. The prac-tical political worker knows well that that political worker knows well that at each voting place the men voters ecme to cast their ballots at the hours, say, in the morning from 7 to 8, and at noon, from 12 to 1, and again from n. until 7 p. m., when the polls Thus one can see that only four Sokol. cours of the twelve are used by approximately 90 per cent of the men ers, thus leaving eight hours when he election officers receive the ballots only a very few voters.

it is a well-known fact that by far the largest majority of women sters are at home during these eight voters are at nome during these eight hours, while the men are at their va-rious places of employment. Now, if the women will go to the polling place during these eight hours the congestion not only will be relieved, but the election officers will be continually employ much to their satisfaction, for only an election officer knows how heavy hangs the time on their hands when no voters come to the polls."

Jealousy Blamed

"Jealousy is the cause of opposition on the part of some men politicians. This attitude, in my opinion, is very much to be regretted. It seems to me that it is more manly to cultivate a spirit of co-operation, for it is a wellestablished fact that no great thing was ever accomplished by men that did not have its inspiration from some sweet, sympathetic woman.

The speaker produced figures to show that an average of 211 women have been assessed so far for each division. There are 1386 divisions, and he said that this ratio, if carried out, will give a grand total of 290,000 women.
