

BODY OF DROWNED HEIRESS IS RECOVERED

Woman Who Lost Life in Potomac Shows No Marks of Violence

Washington, Sept. 13.—Loosened from the bed of the Potomac after a fleet of tugs had been used to churn up the waters, the body of Mrs. Gertrude Viger Kuehling, heiress to a part of a million-dollar estate in Detroit, was found yesterday by one of the scores of canoe-

ists engaged in the search, but her husband, Roy H. Kuehling, still was held today by the police pending the result of the inquest.
On the body there were no marks indicating that death had been caused by any means other than drowning. Kuehling was arrested early Thursday after he had reported to the police that his wife was drowned while they were canoeing Wednesday night. The police announced they suspected that the death or disappearance of the woman might not have been an accident after learning of several circumstances regarded by them as too significant to ignore without investigation.
The canoe capsized in relatively shallow water, according to Kuehling's

story, but he was unable to save his wife. The police developed a case in which Kuehling and his wife, whom he had married after she was divorced from George Osgood, of Detroit, were made to appear as having frequently quarreled and to that was added the declaration of an attorney that he had been instructed by Mrs. Kuehling to begin a suit for divorce charging cruelty.

Mrs. Kuehling's former husband, who is a Detroit real estate dealer, came to Washington late last week to assist in the search for the body and, as he told the police, to aid in clearing up the case. He identified the body when it was brought from the water.
Liner Grounds in St. Lawrence Montreal, Sept. 13.—The transatlan-

tic passenger liner Metagama, which arrived at Quebec Saturday from Liverpool, with 582 cabin and 1172 steerage passengers, ran aground in the St. Lawrence river during a heavy fog early today about twenty-five miles from here. The liner still has on board about 500 passengers for Montreal, who will be transferred to the steamship Three Rivers, sent to the stranded vessel's assistance.

Poincare Through With Presidency Paris, Sept. 13.—President Poincare will not consider a call to resume the presidency, should President Dechanel resign, the former president declares in writing to a provincial paper. "If, unfortunately and as seems utterly improbable," he writes, "a presidential crisis supervenes, I will not resume the office I formerly occupied."

Refugees Arrive in Iamid Constantinople, Sept. 13.—Fifteen hundred refugees have arrived in Iamid, Asia Minor, from the village of Kirazli, after having wandered for forty days in the wilderness and the uncharted valleys of the mountains at the mercy of bandits. They report having lost 1000 persons by starvation and other privations.

5994 Death Claims Paid Washington, Sept. 13.—For the week ending September 4 there were 44,405, 470 industrial life insurance policies in force in the United States, according to figures made public by the Bureau of Census. There were 8094 death claims paid during the week, or about seven per thousand.

THE MOST BEAUTIFUL CAR IN AMERICA

Announcing a New

PAIGE

TO the general motoring public we extend a very cordial invitation to visit our show rooms and inspect a motor car that represents the supreme achievement of the Paige engineering and designing staff.

During the entire coming week, we shall hold "Open House" in recognition of a most important event in Paige history. For, today, we introduce a six-cylinder car that establishes a new standard of automobile value, and creates for itself an altogether unique position in Motordom.

This new Paige Model is unique and distinctive because it is a car without a legitimate competitor. From every standpoint of luxurious motoring it is only comparable with the very finest and

most expensive motor carriages of this country and Europe. Yet —by virtue of its cost alone— it is a member of the popular priced field.

These are indeed strong statements, but we make them with absolute confidence.

If you are inclined to be skeptical, please remember that you have yet to see the most beautiful body design that has ever been produced—a power plant that is capable of seventy-five miles per hour—and a chassis that expresses the last word in strictly modern engineering.

The newest and greatest of all Paiges is here and ready for your inspection. We shall gladly arrange for demonstration upon request.
