Are Exported

Stockholm, Sept. 20. — Exportation from Russia of diamonds and jewels in order to obtain foreign credit for the Soviet Government is defended in a statement by Leo Kamenev, head of the Russian Bolshevist trade mission, printed in the Social Demokraten. Although M. Kamenev denies personal participation in the exportation of precious stones, he declares it has never been a secret, inasmuch as all goods pushed through it will leave a stain on the name of England which has no par-allel (even in her history) and which nothing will ever efface. It will rise before the English people whenever they offer another people friendhip. We feel singularly privileged at being made in-struments of God for evoking such worldwide expressions of admiration and support for the cause of Irish independ-ence and recognition of the Irish repub-

State and crown jewels, adds M. Kamenev, have not been offered for sale because the stock of diamonds on hand. which he admits were taken from shore quate for the purpose.

Message on the Ethics and Practice of Nursing

Message on the Ethics and Practice of Nursing

"Nursing is an art, and if it is to be made an art it requires as exclusive devotion, as hard a preparation as any painter's or sculptor's work, for what is having to do with dead canvas or cold marble compared with having to do with the living body—the temple of God's spirit. It is one of the fine arts. I had almost said the finest of the fine arts. (Florence Nightingale).

If this is true, and who will doubt it, what an entirely satisfactory work is nursing, and yet how necessary that we remember we are dealing with something that requires not only our energy, our interest and our skill, but our deep reverence and highest thoughts?

A young poet killed in France, wrote, "Like the statue in Michael Ankelo's'lump of marble, there is a friend in every passerby, and in one there may be a new Garist," and so of there may be in any human being.

What Dr. S. Weir Mitchell says of the physician is true also of the nurse. "He sells that which men neither weigh nor measure, and this sets him over a'l professions save one, and far above all forms of more form of occupation is there such constant food useful to develop all that is best and noblest."

The highest type only of healthy young womanhood should take up, this work, for it is certainty the highest given to any woman to do. What can be greater than by skill and knowledge to help fan the feehle spark of life to the bright flame of health; to make the stiff arm supple and strong; to lide the Typhoid or the Pneumonia patient past the danger post; to give back to the children, the mother who almost crossed the dark Nothing can adequately pay for the skill which has brought, to the bedside renewed strength and perinaps even the "sweet boon of life"

If she have given back our sick again, is it a little thing that she has wrought?

Then Life and Death and Motherhood is, naught!"
