make rapid adjustments.

Harris J

The maker of your car warns you to do this every 500 to 800 miles. He knows the price you eventually must pay by neglecting this impor-

We make this suggestion. Go to a reliable dealer or garage at once. Have the old contaminated oil removed and the crankcase and engine thoroughly cleaned.

You are then ready to have the reservoir refilled with the correct type of Sunoco-the motor oil that eliminates carbon troubles. Any Sunoco dealer will know the correct type.

Contaminated oil is one of the most prolific sources of engine trouble. Scored cylinders and pistons, badly-worn piston rings and crankshaft bearings, loss of power, high consumption of gas and oil are certain results.

Oil contamination is caused chiefly by dilution with raw gasoline escaping from the combustion chambers through an imperfect piston-ring seal-the result of using a wrong oil.

SUNOCO-with its six distinct types-six different viscosities (bodies)-has the right oil to maintain a proper piston-ring seal in any design of motor, new or old.

SUNOCO eliminates carbon troubles because it is a noncompounded, wholly-distilled oil, absolutely free from carbonforming elements, as "The Burning Test" proves.

of the Dealer who is thinking of You

OBSERVERS of chang-ing conditions know there has never been a time in the history of the retail business in this country when quality and economy ideas-and the dealers who stand for those ideas-had such a hold on the public.

A demand is now sweeping over the country for better-more serviceable -more economical merchandise.

The straightforward dealer knows this.

He knows that once public confidence is established, a dealer's success

is assured-that the public is only going to continue to buy from dealers whom it can trust and esteemmen who always place the interest of their customers first.

That is why, in the stores of over a quarter million dealers in this country, you will always find the Gillette out where you can see and examine it.

On top of the counter-in the show window-ready to be handed out first whenever a man comes in looking for a razor.

The Gillette is the only scientific shaving instrument ever produced.

It started-not with a theory or a desire to sell razors-but with the actual shaving needs of men everywhere.

And working from that, it developed into a personal shaving service-a service that has gone 'round the world and changed the shaving habits of thinking men everywhere.

. Whenever or wherever the topic of a good shave comes up, the Gillette habit is always the final answer.

Vouched for and acknowledged by twenty million men the world over as one of the cleanest, safest, most economical, most valuable habits they have ever formed.

The dealer who hands you a Gillette is thinking first of your interests. Think well of him.

Announcing the New Number of

Conde Nast. Publisher Edna Woolman Chase, Editor Heyworth Campbell, Art Director

early Paris Openings and New York Fashions

number of **DGUE**

Paris Openings: Two words to make any woman stop and look—and long! The first models from the earliest showings of Molyneux, Martial et Armand, Madeleine et Madeleine, Poiret, Redfern, Dœuillet, Jenny—the earliest authoritative modes from Paris in this number of Vogue.

Then there's society in America and in Europe, the Paris letter, the premieres of the theaters, notes on the new and remarkable fabrics and pages of ex-traordinarily smart hats. And the usual articles and drawings in which Vogue presents the earliest authoritative word on every aspect of fashion here and abroad.

Fogue Compo

New York Fashions: They were never so fine in line and colour, never so varied or so suited to the American figure. And Vogue with its entree into the homes of the mode in New York, has chosen over 50 noteworthy designs from the American creators for the first showing in this October 1st 185UC.

And, since fashion is never more provocatively lovely than when some slim mannequin floats her gauges down the three dramatic steps of the conturier's salon, Vogue has an article, with photographs, on the great New York houses where New York Fashions are created and American Society gowned,
