

### TETANUS KILLS BOY AFTER VACCINATION

Fatal Infection Starts When Child Falls and Opens Wound Made by Doctor

### SERUMS ARE GIVEN IN VAIN

Edward Anderson, five years old, 815 Morgan street, Camden, died early today in the West Jersey Homeopathic Hospital from tetanus (lockjaw), due to an infected vaccination.

The boy was vaccinated about three weeks ago. The wound was healing nicely when he fell while playing and struck the vaccination, causing it to open.

He was taken to a physician at once and for a time it seemed that no bad results would come from the fall, but later the arm began to swell and then blood poisoning developed.

Edward was taken to the hospital. There, for almost a week, the doctors fought the advance of the dread ailment, serum being injected in large quantities when the disease did not yield to the first treatment.

But he grew worse steadily and yesterday his condition became critical. He was conscious and brave up until the

### IRELAND LEGION WOULD ADOPT POST

### Commander Says Members Favor Taking Second Organization to Share Headquarters

Harry J. Ireland Post, No. 218, is searching for an American Legion which it can adopt and with whom it can share its headquarters at 1616 Arch street.

Maurice Thomas, commander of Ireland Post, said yesterday the members had concluded it was advisable to increase their membership immediately.

This post has an enrollment of approximately 125, and it ought to have at least 250 to carry its present quarters. It has fitted out one of the finest clubrooms of any post in the city, and it welcomes visits by all legionaries.

**Weathered Storm**

On previous occasions the post has felt the pangs of a small membership and large responsibilities; but always it has weathered the storm and has placed itself in a strong financial position. This time the leaders, including the commander, Robert C. Frei, and David E. McKinley are planning a carnival from which the post will real-

### Eye Talks

By Joseph C. Ferguson, Jr.  
 Our Next Talk Wed., Oct. 29

HERE is a mechanical as well as a professional side to consider whenever glasses are prescribed.

The oculist—the physician who specializes in eye treatment—is pre-eminently qualified to diagnose and prescribe any treatment necessary for correcting eye troubles or diseases, or refractive defects.

If you need glasses, the oculist can prescribe the exact kind needed.

But when this has been done—the making and fitting of the glasses is of an entirely different nature from the professional work of the doctor and should leave to hands skilled in such duties.

The dispensing oculist not only has the equipment and machinery for making and mounting the lenses properly, but is equally skilled in fitting and adjusting, so that the correct results are assured.

When your eyes need attention go to an oculist. If glasses are prescribed, have the prescription filled by a prescription optician.

**ARMLEDER Motor Trucks**

The combination of Fidelity Motors, Inc., and Armleder motor service now makes available to the truck buyers of Philadelphia the most remarkable truck that has ever been built, and assures them of service that measures up to the high standards of Armleder.

"The superiority of the Armleder is due to its design, engineering and construction, combining 12 patented and exclusive features that are essential to the efficient and economical operation of a motor truck.

You will be surprised at the striking advantages of the Armleder. That is why we want you to come in and look it over.

The efficient service we render our owners is equally important.

Our service station contains 12,000 square feet. We employ only the best mechanics, who are expert as well as courteous. Our service is prompt and efficient and our charges are reasonable. Among high-class users the expression is, "If you want your car or truck repaired right, go to 4830 Market and you will get the biggest value for your dollars, and your troubles will be rectified."

Both the Armleder and our service are guaranteed.

If you are looking for transportation efficiency you should see us.
