Society Ladies Adopt New Hair Curling Method Since the introduction of the almirante method in this country, it has become quite "the proper thing" among society women, who have readily adopted it in place of the destructive curling iron. The waves and curls acquired by the new method are far more natural in appearance, and the hair of course is glossier and prettier than could be if the life were cooked out of it.

The liquid is pleasant to use, being neither greasy nor sticky. It is a simple thing to apply with a clean tooth brush before doing up the hair. The lovely way effect in evidence in about three hours it all that one could wish for. It costs little to use liquid almirante, as a few ounces from the dispenser will keep the hair in curl for weeks—Add.
