And Now People Can Give a Thought to Their Personal Needs

We Have Turned a Corner

WANAMAKER'S

Those of us who turned in after the last election and conscientiously tried to support the President during the past four years, have now a fair right to expect that those who did not vote for President Harding will turn in and support him because he received the majority of votes.

We have got to work together, all of us, not only to right whatever we think is wrong, but to unite with the powers to be to bring on the new prosperity that has formed large part of the platform of every public peaker during the last campaigns.

We congratulate the women for the part they had in the past election.

Far and above partisanship and everything else, let us be Americans.

Well, Gentlemen, Now That It's Over—

the thing is to settle down to business.

For many a man the first business to attend to is the buying of a new Winter suit or overcoat.

It would be a good thing if the average man would make himself more familiar with the many different classes of suits and overcoats on the market.

One of the first things he would notice is that some stocks consist of some good suits and overcoats and many that are not good; and other stocks consist of suits and overcoats that are uniformly low grade (although sometimes very showy) at their prices, especially in

Such clothing stocks depend for their sale upon the unquestioning faith of the average man. But it must certainly mean something to the man of more than average observation, the man who wants to feel certain that he is getting the reality and not the shadow, to know that there are men's clothing stocks of the SELECTED kind and the Wanamaker stock is just such

We could make this stock twice as large as it is and not half as excellent. We could do this by mixing in with it a lot of low-grade, botch-work clothing to sell perhaps a little cheaper than the best clothing can be marked.

But we would not lower the character of our men's clothing stock to make it look larger, more varied or more alluring. We prefer to feel certain that no man can take out of it a suit or an overcoat that isn't the best suit or overcoat regularly to be had anywhere for the price we put upon it.

We prefer to feel that we have a men's clothing stock which, as it stands, is unexcelled. And we surely
