

HALT ZELGOSKI ON ENTIRE FRONT

Lithuanians Check Poles as Bolsheviks Vainly Hammer at Wrangel's Line

LETVIA MASSING TROOPS

By the Associated Press
Riga, Nov. 4.—Offensive operations by irregular Polish troops, commanded by General Zelgowski, have been checked along the entire front by the Lithuanians during the past few days, and, as a result, evacuation of Kovno has been postponed. The only point where the Poles have not been defeated is on the northern sector of the line, where they have occupied the railroad station at Dushki.

A Polish armored train which attacked the station at Antokle was repulsed by Lithuanian artillery. Hard fighting has taken place on the line between Vilna and Kovno, where the Poles fired three thousand shells Tuesday. They have been forced out of the towns of Gedroisti and Dubinski.

Reports from Kovno attribute Lithuanian success to assistance given by Prussians, who are said to have been joining the Lithuanian army. Whole units, it is declared, have crossed the frontier with their arms and ammunition. Large quantities of which are said to have disappeared from German government arsenals. It is asserted the Lithuanian government fears these Prussians may later turn to marauding.

The Letvian government is massing troops south of the Dvinsk frontier, fearing an advance in that direction by General Zelgowski's forces.

Sebastopol, Nov. 4.—(By A. P.)—

Russian Bolshevik troops are unsuccessfully attacking the line held by General Baron Wrangel's army south of Perekop. The Soviet army is battering at the seven-mile trench system which extends east and west across the narrow neck of land leading to the Crimean peninsula, but General Wrangel's position is quite strong. It has on its left the Gulf of Perekop and on its right the Gulf of Sivash, or Putrid Sea.

Anti-Bolshevik cavalry is pushing from Sberniograts, west of the Maitopol Railway, southwest toward Salkovo Railway station, attacking the rear of the Soviet troops, who are attempting to take Salkovo, which is defended by General Wrangel's sailors with naval guns.

Paris, Nov. 4.—(By A. P.)—Dispatches received in official circles here today indicate that General Wrangel is likely to be obliged to retreat well into the interior of the Crimea. The Soviet troops, declared to have been strongly re-enforced by Chinese, have about 100,000 men pressing in upon Salkovo and Perekop, the last-named place already having been surrounded.

(A Sebastopol dispatch of November 1 said General Wrangel admitted the loss of Perekop to the Soviet forces.)

Copenhagen, Nov. 4.—(By A. P.)—The Berlingske Tidende's Kovno correspondent says that Moscow newspapers received in Kovno yesterday record an official announcement of the discovery by the Soviets of plans for a big counter-revolution. Precautions have been taken and thousands of persons are being arrested daily, the newspapers say, and the general staff has detained 3000 of the former czar's officers, who have been interned in Orenburg.

According to the Moscow Pravda, as quoted by the correspondent, Leon Trotsky, the Bolshevik minister of war and marine, in a speech in Petrograd declared: "I know danger is coming. I realize the possibility of a severe winter, but though three-fourths of the population die of hunger and cold the remainder will survive to carry through to victory world revolution."

London, Nov. 4.—(By A. P.)—The town of Tralee, Ireland, where the city hall and other buildings were burned Sunday following the wounding of a naval driver, was the scene of further raiding last night, according to dispatches today. When the military who had taken over the town retired near midnight, the messages state, uniformed men appeared armed with hatchets, crowbars and petrol bombs. These men attacked and set on fire the premises of local members of the Sinn Fein. Some of the owners of the property attacked fled into the open country. Others who remained narrowly escaped injury.

The military, it is added, returned early in the morning and assisted in restoring order and extinguishing the flames.

pector of Police Kellegher, which occurred Sunday evening, were carried out here at midnight last night, when eleven motor lorries filled with uniformed men invaded the town. Rifles were fired into houses and business premises were burned. The buildings destroyed included the market house and hotel, valued at \$375,000.

BRITAIN AND MEXICO AGREE

Diplomatic Relations to Be Resumed in December

Paris, Nov. 4.—(By A. P.)—The special diplomatic mission of Felix F. Palavacini, owner of El Universal of Mexico City, for the Mexican Government to various European governments has been finished. He has arranged with the British Government to renew diplo-

matic relations with Mexico, disrupted since 1914, in December.

In Belgium Senior Palavacini was received by King Albert, in Spain by King Alfonso and in France by President Millerand. The Spanish Government decided to help the investment of Spanish capital in oil exportation from Mexico. Italy will establish a direct steamship line with Mexico.

Mexico, Senior Palavacini said today, has the friendship of all the European countries. "As the policy of Mexico toward the United States will be friendly," he continued, "the relations between Mexico and all the world outside will be very good in the future."

MEXICAN EXECUTED

Colonel Also Arrested for Killing Americans at Tampico

Washington, Nov. 4.—(By A. P.)—Summary trial and execution of an unnamed Mexican, charged with the murder of Arthur L. Moseley and Gustave Salazar, American citizens, has been reported to the American embassy at Mexico City by the Mexican foreign office, the State Department was advised today.

The foreign office also reported to the embassy that Lieutenant Colonel Guadalupe Gonzalez has been arrested.

The Phonograph

In 1877, Thomas A. Edison showed to a few friends a modest-looking little machine.

He turned a crank and to the astonishment of all it said: "Good morning! How do you do? How do you like the Phonograph?"

The basic principles of Edison's invention remain unchanged.

The greatest development of the phonograph has been commercial. Millions of phonographs and billions of records are now in use. It is estimated that more than 20 large manufacturers are engaged in this industry, their capitalization exceeding \$25,000,000.

The banking institutions of America may well be proud of the part they played in the rapid growth of this business.

We are Commercial, Convenient and Progressive.

SUNSEAL SUNNYCORN

The Instant-Cooked Breakfast Cereal

Delightful to Eat!

This new breakfast food is so delicious because it is made of only the hearts of the finest white corn, finely ground and thoroughly steam-cooked in our patented milling process.

It is prepared in an instant, by simply stirring into boiling water, and yet tastes and is completely cooked—mellow, creamy, delicious—an advantage that you will appreciate, and one that has never before been offered in a cooked cereal.

Try a package. Your grocer will refund your money if you are not entirely satisfied.

Never cook Sunnycorn over two minutes.

SUNSEAL DELICIOUS FOODS

Mongette A new kind of Pudding Powder of fine white corn. Makes delicious desserts without eggs—blanc manges, custards, puddings. Thickens gravies, ice cream, soups, etc. Delicious recipes in package. Over 7% protein—exceptionally nutritious and wholesome.

SUNNYCORN The Instant-Cooked Cereal
Made only from that part of the kernel which before drying is the delicious sweet pure milk of the corn. Carefully refined and thoroughly cooked by our patented new milling process. Weighs on the tongue. Highly nutritious, easily digestible, delightful to eat.

Prepared and Sold by THE PATENT CEREALS COMPANY, Geneva, N. Y.

Look ahead in planning your factory

Manufacturers should remember six things before building a factory:

- To see that every detail of the factory is planned in advance, leaving nothing "to be worked out afterward"—One of the most valuable features of the Steele Idea of Industrial Construction is that it leaves no room for miscalculation, because even the emplacement of machinery and the location of power and wiring are worked out in the original plans.
- To be sure that provision is made for the future growth of your business—Under the Steele Idea we will build you a plant no bigger and no more costly than your present business warrants but which will be planned and designed with a flexible capacity that will absorb future growth without the usual expensive building or remodeling.
- To be sure that an economical routing system is installed—one that will yield maximum production at minimum cost—We have proved time and again our ability to decrease production cost and increase production capacity by improved methods of routing materials, laying out machinery, co-ordinating departments and planning all such details of a manufacturing plant.
- To be sure your power plant is adequate for all demands our architects, working with our engineers, see that the original building plans call for the right powerhouse in size, location and interior arrangement. We purchase and install the engines, boilers and all equipment necessary for a complete plant and make complete tests under actual operation. We stand fully responsible for their efficiency and complete ability to do the work required.
- To be sure that insurance costs have been kept to a minimum—In some cases the insurance savings which we have effected for our clients are large enough to go a long way toward paying the interest on the cost of building the new plant.
- To have your factory built by the same organization which plans it—Not only do better plants result from this method but frequently they can be finished quicker. Not only is money saved in the cost of construction but the plant keeps right on saving money for its owners in operation.

If you are a manufacturer thinking of building, remodeling or enlarging a plant, we would welcome an opportunity to prove to you the value of our services without cost or obligation to you. Write or phone for interview.
