ESSEX MOTOR CARS

An Essex Advantage That All Acclaim

The distinction of performance which rates the moderate-priced Essex among the fine cars of the world is by no means confined to its greater speed, acceleration and hill-climbing ability.

Official proofs remove its supremacy in those qualities from debate. No car of its motor size ever matched them. Some of its marks were never equaled by any car, regardless of size, price or type.

Thus Essex Takes Rank With the Greatest Cars

Yet if one quality, more than another, causes men to link Essex in merit with the costly cars, it is its ease of motion, and elastic smoothness of action, which have no counterpart among light cars.

That is the enchantment Essex owners admit they value next to its reliability. Even long association they say does not dispel the impression of riding in a large car.

We know in all candidness that few men ever have call for such speed and power as Essex possesses. Yet no owner mistakes it for useless surplus. This excess ability is valued chiefly because it does the ordinary task without effort. And because men like to have capacity that can meet exceptional calls for power, speed and acceleration, with an ease and absence of strain that brings no concern as to its accomplishment.

The satisfaction and enthusiasm of nearly 50,000 owners contents us to leave the judgment of the Essex in their hands.
