This Is a Safe Time

The commission on revision of the constitution is to meet in Harrisburg December 14 to draft its recommendations to the Legislature. The Governor recommends that the commission favor a constitutional convention. He disagrees with Senator Penrose, who argued that this was not the time to rewrite the constitution. The Governor feels that the state and nation are so thoroughly in the control of sane and sober Republicans that there could no better time than the present for andings of the convention.

Far better to have the convention held now, the Governor indicated, than at a later time, under pressure, when perhaps the leadership of the state and I will have time to enjoy reading politicountry would be in more radical and unstable hands. To Annul Soldier Vote

There is much interest in the vote cast by the army, which has not yet been returned, and which it has been thought might affect the Venizelist cause favorably. The opposition's press bureau, however, is quoted today as declaring that the voting at the front would be annulled.

Reasons for his defeat are said by former Premier Venizelos to be the weariness of the people with politics, their desire for a rest and for the return of soldiers from the front, and emphasis placed by opponents on the charge that he was putting Greece into the hands of foreign nations. M. Venizelos delares this charge aroused fears of protracted wars in connection with his Greater Greece policy and he says pop-ular jealousy played a part in his re-verse at the polls last Sunday.

Premier Calm in Defeat

Labor Leader Declares Prices Can Come Down Without Affecting Wages

CONSUMERS IN CONVENTION
Since the last Legislature it has been generally conceded that, with the expiration of his present term, Senator Knox would retire from the Senate.

As the place belongs to the West, Senator Consumer Cons ator Crow has been looked upon as the logical man to succeed Knox.

Discussing the flour situation, Mr. Walker said that in making flour under the old-fashioned formula, four and one-half bushels of wheat made a bar-rel of flour, and there was enough "middlings" and bran left to pay for
