For tenderness, for human insight for whinsical humor and for sound sense there is no play of its kind in the language which can rival this. It is a fantasy of course, One could attack it for its lack of plausibility and for its extravagant demands on the imagination of the reader. But Mr. Barrie did not write it for people with neither imagination nor sentiment. The version now offered to the public differs in some respects from the version which Maude Adams acted at the Broad Street Theatre. Whether Mr. Barrie has made additions to it or whether certain parts were cut out in order to concentrate attention on the part of Cinderella does not appear. But the play now stands in the shape in which its author wishes it to remain. That is enough for most of us, who are centent with anything which this marvelously gifted Scotchman chooses to offer.

THE PERSISTING LABOR PROBLEM THE MIDDLE OF THE ROAD

As Viewed From Different Angles by Various Authorities

Sigmund Mendelsohn, a well-known manufacturer, in "Labor's Crisis," gives an employer's view on labor problems. His book, which is menty rather than lengthy, opens with a definitory chapter on "Poverty and its nature and effect," which leads naturally into consideration of such topics as poverty in relation to labor, labor viewed as a nonommodity and the cost of living.

The writer makes no pretensions to cientific analysis and systematization out offers his theories out of practical experience. He discusses various prop sitions advanced by the unions to rem edy existing industrial unrest, suggest many effects and influences of the unres on production and on labor, and ven tures the suggestion that labor scarcit; is not entirely due to curtailment in the umerical strength of workmen. Employers and students of the labor question will find this little book interest and value.

as the product of the surviving simian as the product of the surviving simian instincts in men.

Monkeys spend their time chattering. They are not able to follow anything to its proper conclusion. They are forgetful, but they are curious. Before they find out anything definitely, however, their attention is distracted to something else. In most general terms Mr. Day describes how men are like monkeys. In a real civilization he says that there would be no lost arts, for example, and men who knew that war was wasteful would not spend their time chattering. However, their attention is distracted to something else. The Spell of France

The translation of Andre Hallays' book on Alsace that appeared about a year ago has prepared the reading public for "The Spell of the Heart of France," which has appeared in time for the holiday season. Mr. Hallays describes the famous architectural monuments gathered in the vicinity of Paris and writes about the great people in French history whose lives were commented with the structures. In doing this he has in a way rewritten much of the social, literary and political history of the country, and he has done it in such a manner as to make his book as easy to read as a novel.
