TAILORED LINGERIE

Can you see such different styles as "severely tailored" and "soft lingerie" being worn in one garment? The newest underthings seem to prove it. They are made of softest pussy willow silk, trimmed with lace, but their cut is simple, their adornment slight and their general effect "neat but not fancy."

ONE COLLEGE FOR WOMEN BARS THE "CHILD PRODIGY"

She Must Be at Least Sixteen Before She Can Enter—This Plan Avoids Embarrassment for Her and Her Classmates

THERE is always a great deal of talk about "child-prodigies." We hear for months about the boy who enters college at fifteen; remarkable tales and his ability, his marvelous mind, his knowledge of studies and sciences that are beyond many of his elders... A NOTHER poor soul inherits a large sum of money, and must face the child even younger than this who plays numerous games of chess at one time, winning all of them, against opponents who are much older than he.

PERHAPS they get along better with children in men's colleges; they may find their own little niche and stay in it until they are called out. But with all the problems and difficulties which would arise for both prodigy and elders, it seems a very wise plan to bar them out from women's colleges until they are old enough to go as "regular girls," instead of wonderful ones.

HUMAN CURIOS

The Man Who Could Not Be Electrocuted... "There's no use in trying it—it simply can't be done." This was the challenge which Jose Godinez, a Spaniard, hurled at the officers of the death house at Sing Sing a few years ago, adding that he was so constituted that no amount of electricity made any impression upon his system... In spite of the fact that the electricians at Sing Sing were quite willing to accept the challenge, provided Godinez would assume the responsibility for the procedure, the experiment, unless the Spaniard would be found guilty of some crime which is punishable by death, was this he naturally did not care to undertake.
