Germantown Friends' School, Friends' Select, Irwin's, Springside School, Shady Hill and Miss Hill's School all have teams in action. These schools are in a hockey league and are now playing basketball and from the number of girls out for the teams it will be a super year.

At Holman School, Friends' Central, Abington, Swarthmore High, Narberth High, Woodbury, Haddonfield, Haddon Heights and other schools in this vicinity there are girls' teams above the average.

### NO NEW MEN FOR INDUSTRIAL FIVES

#### Teams in Manufacturers' Basketball League Must Finish Season With Present Players

No new players can be signed by teams in the Manufacturers' Basketball League during the remainder of the season, and the line-up now representing the various concerns will finish the season. The clubs are all closely bunched, but chief interest centers in the fight to meet Baldwin Locomotive Works' first half champions, in the play-off.

The second series will be practically settled when the undefeated leaders, Butterworth and Dobson, clash in the crucial contest. In the opening half Dobson battled Baldwin for the title and Baldwin won the honors. Butterworth recently admitted, has gone along without defeat, and the game that will decide the second half is anxiously awaited.

The regular scheduled contests of last night were postponed until later in the season, as the league is conducting its first annual dance this evening at the playing quarters, Yonah Hall, 2727 Columbia avenue, which promises to be a big affair because it has the backing of all the leading officials of the eight plants represented and who will be present to add to the success of the occasion.

#### Stimulinger to Play

While the present line-ups must remain intact, there is one player who has been registered by two teams and not played as yet. Cy Stimulinger, former Eastern League, who has been making such a record at West Chester, is registered both by Baldwin and Butterworth, but it is whispered that Butterworth will be the one to play him.

Baldwin has been counted out of the race by many, but the players, managers and rooters still have a lunch that this series may terminate in a tie.

## Five facts every chauffeur knows

**EVER** watch a good chauffeur slip his car through and 'round traffic?  
What's the difference between his smooth-running engine and yours? How does he start his engine so quickly on cold snappy days?

Below are facts which the best chauffeurs have had to learn:

1. Ordinary sluggish gasoline vaporizes slowly. It's hard to start, requires a rich, wasteful mixture and gives poor mileage.
2. Excessive carbon deposits and knocking follow the use of low-grade gasoline.
3. Gasoline that vaporizes slowly contaminates the lubricating oil dangerously in cold weather.
4. To warm up a cold engine with low-grade gas requires a long, wasteful period of racing the engine.
5. Tydol, the Economy Gasoline, vaporizes fast. It starts easily, quickly.

Tydol is specially made to operate on the famous, lean 15 to 1 mixture. (See the chart at the left.)

Fill up the tank with Tydol. See how much smoother your engine runs, how much more mileage you roll up, even in traffic. Get rid of starting troubles.

Look for the orange and black Tydol sign today.
