In mail order or direct reply advertising, the relative "pulling power" of advertisements is carefully gauged.

To watch the response of the public to variations in the "copy" in mail order advertising is a most interesting and profitable study.

For example, the two best headlines of a physical - culture - by - mail advertiser were, (1) 'You know in your heart you are not giving your body a square deal," (2) "The man who is always tired out will soon be worn out."

Over a period of years with many experiments. under all conditions, these two heads proved best. "All advertising is good, only some is better than the rest."

The making of advertisements commands real talent and good advertising demands its employment.
