Propaganda

With the war most of us acquired a new word

The word is new and convenient, but the action it connotes is another phase of our old friend advertising.

Most people think of advertising as calculated to sell goods.

Only of recent years have we seen advertising used to sell ideas.

If it is desired to stop unnecessary coughing in the theatre, - to promote courtesy on the telephone, - to brush the teeth or - to create a national demand for the metric system, it may be accomplished by advertising.

If you want to sell goods, services or ideas to a nation-advertise nationally.
