

RAIL HEADS PROBE CAUSE OF WRECK

Towermen Declare New York Central Train Had Right of Way

DEATH TOTAL FIXED AT 38

By the Associated Press
Porter, Ind., March 1.—Investigations by Indiana state officials and officers of the Michigan Central and New York Central Railroads were continued today to determine the cause of the wreck here Sunday night fatal to thirty-eight passengers on the eastbound Michigan Central train.

Members of the Michigan Central train crew were closed all day yesterday with General Superintendent J. I. McKee, but no statement was given out. The inquiry was conducted at Niles, Mich., and early today the officials returned to Porter for further investigation.

Officials of Porter county early today took steps to have Coroner H. O. Seipel, of Porter county, call an inquest. Most of the statements so far obtained from railroad men connected with the wreck have been made to press representatives, and Robert H. Moore, deputy prosecuting attorney of Porter county, declared he would start mandamus proceedings against the coroner unless an inquest was opened at once, to take official testimony.

Both Towermen Joseph Cook and Operator Charles Whitehead insisted that the New York Central train was given the right of way, and that the Michigan Central track signals were set to stop.

New York Central officials declared the fact that the New York Central train did not leave the rails proved that the clear signal had been given that train, and pointed out that it is mechanically impossible to give "both" trains a clear signal.

Engineer W. E. Long and Fireman George Block, of the Michigan Central train, declared they saw the signal to proceed and continued on the rails. New York Central officials declared, however, that the engine had been derailed and had jumped back on the rails when the front trucks struck the guard rails at the diamond crossing.

Of the thirty-five bodies taken to the Chesterton morgue, a mile from the wreck, identifications had been made of all except two, but some of these were regarded by Coroner Seipel as unidentified. The coroner declared the death toll would not exceed thirty-eight. Eight of the bodies have been claimed by relatives and removed for burial. Bodies of four women and one man remained today unidentified, but some of them could only be recognized by relatives, officials said.

The Only One Crimped

It Would Tire an Athlete

to walk or stand in the shoes worn by the average woman. With the body thrown out of poise by high heels, every pound is carried as dead weight. And with toes cramped and the feet laced against a stiff shank so that the muscles are not free to function, the gait becomes unnatural and causes fatigue.

The flexible, natural-shaped Cantilever Shoe permits every muscle the full liberty necessary to an elastic step and perfect balance. The body is swung easy from one foot to the other, a steady motion is maintained, and one walks gracefully and without fatigue.

Plenty of toe-room, correct heels, contribute to the comfort of Cantilevers. And they are made in styles approved by the fashion magazines for daytime service. Widths AAAA to E.
