Few realize the contribution America has made to Japan," he said. While that nation has been building up her modern civilization, she chose to fashion her navy along British lines; she copied much of her army organization from Germany before the war; and she took from America the example for her public school system. Mr. Morris paid high tribute to Mr. Gratz for his "devotion to this supreme work in our community life for more than half a century."

More Than Speed or Climbing

DOWER means more than brute strength. The power of the Standard Eight is not the power of the motor alone, any more than the strength of a man means big biceps alone.

Power in an automobile involves the relation of motivity to weight, the co-ordination of balance with mass. This gives a responsiveness that is quick and sure. It is what the good golfer puts into his drive that gives him long distance without apparent effort. It is what the billiard player puts into his shot that gives a long roll to the balls without seeming to shoot hard.

Driving a Standard Eight gives you the same sort of pleasure you get when you play a game extremely well. You are exhilarated every minute of the while, you are not fatigued at the end, and you look forward to doing it again.

"Many of the pupils are given difficult literary studies that are over their heads. They come into the higher achoois with an appreciation, but not a lundamental knowledge, of English.

Miss Newitt suggested that English courses in the public schools should be revised. She advocated a national survey to determine grammar's relative value with respect to other English subjects. That determined, she ndied grammar either should be given greater prominence.

Tells of German Feeling
In the history section Dr. R. W. Kelsey, of Haverford College, related recent experiences in a tour of Europe. The intellectual classes of Germany, he said, are smarting under the humiliation of their country's defeat and are annuous for retailate, particularly against France.

Dr. Kelsey said he found the worst conditions in Italy. The red and the black flags had been raised over many factory buildings, he said, but the Bolshevists proved poor administrators and could not obtain raw materials.

Dr. William Burdick, director of physical education at Baltimore, speaking before the physical education section, said its purpose was to develop character, not merely the strengthening of sinews and muscles. "Physical education." he said. "brings out the heathen virtues of admiration of strength, force, power, obedience, discipline, courage, endurance, bravery, allegiance, patriotism and loyalty."
