### Bread with Raisins is a Better Food

Forget, for a moment, the delicious flavor of raisin bread and think of its value as a food.

Raisins furnish 1560 units of energizing nutriment per pound, as well as natural iron which brings the rose tint to women's and children's cheeks.

The raisin's pure fruit sugar is in practically predigested form, so it is almost immediately assimilated. This fruit-food value added to the nourishment of wheat, forms an almost ideal food.

Send 'round the corner or telephone to your grocer or bake shop for a loaf of Sun-Maid Raisin Bread or bake a loaf at home according to the recipe at the right.

The raisin flavor permeates the bread. Try the bread plain, with or without butter. Learn what delicious toast it makes. Serve at least twice a week to break the monotony of plain bread.
